## Chapter 1 Product Introductions
1.1 Overview ....................................................... 14
1.2 Hardware Specification ........................................ 15
   1.2.1 CV-108/P1001 .............................................. 15
   1.2.2 CV-110/P1001 .............................................. 19
   1.2.3 CV-112/P1001 .............................................. 23
   1.2.4 CV-115/P1001 .............................................. 27
   1.2.5 CV-W115/P1001 ............................................ 31
   1.2.6 CV-117/P1001 .............................................. 35
   1.2.7 CV-119/P1001 .............................................. 39
   1.2.8 CV-W121/P1001 ............................................ 43
   1.2.9 CV-W124/P1001 ............................................ 47
1.3 System I/O ...................................................... 51
   1.3.1 Front ..................................................... 51
   1.3.2 Rear ...................................................... 52
   1.3.3 Side (Left) ................................................ 53
   1.3.4 Side (Right) .............................................. 54
   1.3.5 Top ...................................................... 55

## Chapter 2 Jumpers and Connectors
2.1 Jumper Settings ............................................... 57
2.2 Locations of the Jumper and Connector ..................... 57
   2.2.1 Top View ................................................ 57
   2.2.2 Bottom View ............................................ 58
2.3 Connector / Jumper / Switch Definition ..................... 59
2.4 Switches Definition ........................................... 60
2.5 Jumpers Definition ............................................ 61
2.6 Connectors Definition ....................................... 61

## Chapter 3 System Setup
3.1 Removing the Top Cover ...................................... 70
3.2 Installing a Half Size Mini PCIe Card ....................... 71
3.3 Installing a Full Size Mini PCIe Card ....................... 72
3.4 Installing Antennas ............................................ 73
3.5 Installing a SO-DIMM ........................................ 75
3.6 Installing the Top Cover ...................................... 76
3.7 Installing a SATA Hard Drive ................................ 77
Chapter 4 BIOS Setup
4.1 BIOS Introduction ......................................................... 79
4.2 Main Setup ................................................................. 80
  4.2.1 System Date .......................................................... 80
  4.2.2 System Time ......................................................... 80
4.3 Advanced Setup ......................................................... 81
  4.3.1 ACPI Settings ........................................................ 81
  4.3.2 Super IO Configuration ............................................ 82
  4.3.3 Hardware Monitor .................................................. 84
  4.3.4 Serial Port Console Redirection ................................. 84
  4.3.5 CPU Configuration ................................................ 85
  4.3.6 Thermal Configuration ............................................ 86
  4.3.7 SATA Configuration ............................................... 87
  4.3.8 OS Selection ....................................................... 88
  4.3.9 Compatibility Support Module Configuration ............... 89
  4.3.10 USB Configuration ............................................. 90
4.4 Chipset ................................................................. 91
  4.4.1 North Bridge ....................................................... 91
  4.4.2 South Bridge ....................................................... 93
4.5 Security ................................................................. 95
  4.5.1 Administrators Password ...................................... 95
  4.5.2 Users Password .................................................. 95
4.6 Boot ................................................................. 96
  4.6.1 Setup Prompt Timeout ............................................. 96
  4.6.2 Bootup NumLock State .......................................... 96
  4.6.3 Full Screen Logo Show .......................................... 96
  4.6.4 Fast Boot ......................................................... 96
4.7 Save & Exit ............................................................ 97
  4.7.1 Save Changes and Reset ....................................... 97
  4.7.2 Discard Changes and Reset .................................... 97
  4.7.3 Restore Defaults ................................................ 97
  4.7.4 Save as User Defaults .......................................... 97
  4.7.5 Restore User Defaults .......................................... 97

Chapter 5 Product Application
5.1 Digital I/O (DIO) application ........................................ 99
  5.1.1 Digital I/O Programming Guide ................................. 99
5.2 Digital I/O (DIO) Hardware Specification ........................ 104

Appendix Panel Mount Procedures .................................... 108

No parts of this manual may be copied, modified, or reproduced in any form or by any means for commercial use without the prior written permission of Cincoze Co., Ltd. All information and specification provided in this manual are for reference only and remain subject to change without prior notice.

Acknowledgement

Cincoze is a registered trademark of Cincoze Co., Ltd. All registered trademarks and product names mentioned herein are used for identification purposes only and may be trademarks and/or registered trademarks of their respective owners.

Disclaimer

This manual is intended to be used as a practical and informative guide only and is subject to change without notice. It does not represent a commitment on the part of Cincoze. This product might include unintentional technical or typographical errors. Changes are periodically made to the information herein to correct such errors, and these changes are incorporated into new editions of the publication.

Declaration of Conformity

FCC

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

CE

The product(s) described in this manual complies with all application European Union (CE) directives if it has a CE marking. For computer systems to remain CE compliant, only CE-compliant parts may be used. Maintaining CE compliance also requires proper cable and cabling techniques.
Product Warranty Statement

Warranty
Cincoze products are warranted by Cincoze Co., Ltd. to be free from defect in materials and workmanship for 2 years from the date of purchase by the original purchaser. During the warranty period, we shall, at our option, either repair or replace any product that proves to be defective under normal operation. Defects, malfunctions, or failures of the warranted product caused by damage resulting from natural disasters (such as by lightning, flood, earthquake, etc.), environmental and atmospheric disturbances, other external forces such as power line disturbances, plugging the board in under power, or incorrect cabling, and damage caused by misuse, abuse, and unauthorized alteration or repair, and the product in question is either software, or an expendable item (such as a fuse, battery, etc.), are not warranted.

RMA
Before sending your product in, you will need to fill in Cincoze RMA Request Form and obtain a RMA number from us. Our staff is available at any time to provide you with the most friendly and immediate service.

RMA Instruction
- Customers must fill in Cincoze Return Merchandise Authorization (RMA) Request Form and obtain a RMA number prior to returning a defective product to Cincoze for service.
- Customers must collect all the information about the problems encountered and note anything abnormal and describe the problems on the “Cincoze Service Form” for the RMA number apply process.
- Charges may be incurred for certain repairs. Cincoze will charge for repairs to products whose warranty period has expired. Cincoze will also charge for repairs to products if the damage resulted from acts of God, environmental or atmospheric disturbances, or other external forces through misuse, abuse, or unauthorized alteration or repair. If charges will be incurred for a repair, Cincoze lists all charges, and will wait for customer’s approval before performing the repair.
- Customers agree to insure the product or assume the risk of loss or damage during transit, to prepay shipping charges, and to use the original shipping container or equivalent.
- Customers can send back the faulty products with or without accessories (manuals, cable, etc.) and any components from the system. If the components were suspected as part of the problems, please note clearly which components are included. Otherwise, Cincoze is not responsible for the devices/parts.
- Repaired items will be shipped along with a "Repair Report" detailing the findings and actions taken.

Limitation of Liability
Cincoze’ liability arising out of the manufacture, sale, or supplying of the product and its use, whether based on warranty, contract, negligence, product liability, or otherwise, shall not exceed the original selling price of the product. The remedies provided herein are the customer’s sole and exclusive remedies. In no event shall Cincoze be liable for direct, indirect, special or consequential damages whether based on contract of any other legal theory.
Technical Support and Assistance

1. Visit the Cincoze website at www.cincoze.com where you can find the latest information about the product.

2. Contact your distributor or our technical support team or sales representative for technical support if you need additional assistance. Please have following information ready before you call:
   - Product name and serial number
   - Description of your peripheral attachments
   - Description of your software (operating system, version, application software, etc.)
   - A complete description of the problem
   - The exact wording of any error messages

Conventions Used in this Manual

| WARNING | This indication alerts operators to an operation that, if not strictly observed, may result in severe injury. |
| CAUTION  | This indication alerts operators to an operation that, if not strictly observed, may result in safety hazards to personnel or damage to equipment. |
| NOTE    | This indication provides additional information to complete a task easily. |
Safety Precautions

Before installing and using this device, please note the following precautions:

1. Read these safety instructions carefully.
3. Disconnect this equipment from any AC outlet before cleaning.
4. For plug-in equipment, the power outlet socket must be located near the equipment and must be easily accessible.
5. Keep this equipment away from humidity.
6. Put this equipment on a reliable surface during installation. Dropping it or letting it fall may cause damage.
7. Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.
8. Use a power cord that has been approved for using with the product and that it matches the voltage and current marked on the product’s electrical range label. The voltage and current rating of the cord must be greater than the voltage and current rating marked on the product.
9. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
10. All cautions and warnings on the equipment should be noted.
11. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient overvoltage.
12. Never pour any liquid into an opening. This may cause fire or electrical shock.
13. Never open the equipment. For safety reasons, the equipment should be opened only by qualified service personnel.

If one of the following situations arises, get the equipment checked by service personnel:

- The power cord or plug is damaged.
- Liquid has penetrated into the equipment.
- The equipment has been exposed to moisture.
- The equipment does not work well, or you cannot get it work according to the user's manual.
- The equipment has been dropped and damaged.
- The equipment has obvious signs of breakage.

14. CAUTION: Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer.
Package Contents

Before installation, please ensure all the items listed in the following table are included in the package.

CV-117G-R10/P1001-R10 | 17” TFT SXGA 5:4 Panel PC without Touch, w/ Intel Atom E3845 Quad Core, 4x USB, 2x COM, 1x VGA and 1x DisplayPort

CV-117G-R10/P1001E-R10 | 17” TFT SXGA 5:4 Panel PC without Touch, w/ Intel Atom E3845 Quad Core, 4x USB, 2x COM, 1x VGA and 1x DisplayPort and 2x Universal bracket

CV-119G-R10/P1001-R10 | 19” TFT SXGA 5:4 Panel PC without Touch, w/ Intel Atom E3845 Quad Core, 4x USB, 2x COM, 1x VGA and 1x DisplayPort

CV-119G-R10/P1001E-R10 | 19” TFT SXGA 5:4 Panel PC without Touch, w/ Intel Atom E3845 Quad Core, 4x USB, 2x COM, 1x VGA and 1x DisplayPort and 2x Universal bracket

CV-W121G-R10/P1001-R10 | 21.5” TFT Full HD 16:9 Panel PC without Touch, w/ Intel Atom E3845 Quad Core, 4x USB, 2x COM, 1x VGA and 1x DisplayPort

CV-W121G-R10/P1001E-R10 | 21.5” TFT Full HD 16:9 Panel PC without Touch, w/ Intel Atom E3845 Quad Core, 4x USB, 2x COM, 1x VGA and 1x DisplayPort and 2x Universal bracket
Chapter 1

Product Introductions
1.1 Overview

The CV-100/P1000 Series all-in-one panel PC offers LED backlight LCD. It features flat surface and IP65 dust/waterproof front panel. In addition, designed with aluminum die-cast front frame with rugged body structure that can be able to apply in industrial applications. The CV-100/P1000 Series supports Convertible Display System (CDS) technology which makes it more flexible in system maintaining and upgrading. The CV-100/P1000 Series carries single touch function with resistive 5-wire touch screen. By incorporating with Intel® Atom™ E3845 processor and DDR3L memory, The CV-100/P1000 Series offers extensive I/O including 4x USB, 2x RS232/422/485, 1x VGA, 1x DisplayPort and 4 DI / 4DO.

The CV-100/P1000 Series supports 3G and WLAN via 2x GbE and 1x Mini-PCIe socket. Furthermore, they are 3 types of storage devices including 2.5” SATA HDD, CFast and SIM card. The accessible design of these storage devices allow quick data access and easy maintenance. Supporting wide range power DC input from 9 ~ 48VDC, The CV-100/P1000 Series can be deployed and powered for various industrial applications.
1.2 Hardware Specification

1.2.1 CV-108/P1000

**CV-108R/P1000 | CV-108C/P1000**

**Display**
- LCD Size: 8.4" (4:3)
- Max. Resolution: 800 x 600
- Brightness (cd/m2): 400
- Contrast Ratio: 600 : 1
- LCD Color: 262K
- Pixel Pitch (mm): 0.213 (H) x 0.213 (V)
- Viewing Angle (H-V): 150 / 130
- Backlight MTBF: 30000 hrs (LED Backlight)

**Touch**
- Resistive 5-wire Touch for CV-108R/P1000 Only
- Projected Capacitive Touch for CV-108C/P1000 Only

**Environment**
- Operating Temperature: Ambient with Air Flow:
  - CV-108R/P1000: -20°C to 70°C
  - CV-108C/P1000: -20°C to 70°C
  (with Industrial Grade Peripherals)
- Storage Temperature:
  - CV-108R/P1000: -30°C to 80°C
  - CV-108C/P1000: -20°C to 70°C
- Relative humidity:
  - CV-108R/P1000: 90% RH @ 60°C (non-condensing)
  - CV-108C/P1000: 85% RH @ 60°C (non-condensing)
- IP Level: IP 65 Compliant Front Panel

**Physical**
- Dimension (WxHxD):
  - CV-108/P1001: 262 x 186.2 x 65 mm
  - CV-108/P1001E: 262 x 186.2 x 87.5 mm
- Weight:
  - CV-108R/P1001: 2.96 kg
  - CV-108C/P1001: 2.90 kg
  - CV-108R/P1001E: 3.16 kg
  - CV-108C/P1001E: 3.10 kg
- Construction Front Panel: Die-cast Flat Surface
- Mounting: Panel / VESA Mounting / *Rack Mounting (*with optional mounting kit)
Chapter 1: Product Introductions

Processor System
- Onboard Intel® Atom™ Processor E3845 Quad Core, 1.91 GHz with AMI 64Mbit SPI BIOS.

Memory
- 1x 204-Pin SO-DIMM DDR3L 1066 / 1333MHz (un-buffered and non-ECC), Max. up to 8GB

Ethernet
- 2 x Intel® i210-AT GbE LAN Port, Support Wake-on-LAN and PXE

Storage
- 1x External 2.5" SATA HDD Bay
- 1x External CFast Socket
- 1x External SIM Card Socket

I/O Ports
- 1x VGA
- 1x DisplayPort
- 1x USB 3.0
- 3x USB 2.0
- 2x DB9 for COM1~2, Support RS232/422/485 with Auto Flow Control
- 8x Optical Isolated DIO (4x DI, 4x DO), 10-Pin Terminal Block, Support 9~30V
- 1x Line-out
- 1x Mic-in
- 1x Power Switch
- 1x Reset Button
- 1x AT/ATX Switch

Expansion
- 1x Full-size Mini PCIe Socket for Wi-Fi / GSM / Expansion Module
- 2x Universal I/O Bracket (CV-108/P1001E Only)

Other Features
- Watchdog Timer: Software Programmable Supports 256 Levels System Reset
- Audio: AMP 2W + 2W (Internal Speaker)
- OSD Function: LCD On/Off, Brightness Up/Down

Power Requirement
- Support AT, ATX Mode
- 1x 3-pin Terminal Block Connector with Power Input 9~48VDC
- 1x Optional AC/DC 12V/5A, 60W Power Adapter

Operating System
- Windows® 10/8.1/7
- Linux® Kernel 3.x

Certification
- CE
- FCC Class A

"CV"-100/P1000 Series Industrial Panel PC | User’s Manual
**Processor System**
- Onboard Intel® Atom™ Processor E3845 Quad Core, 1.91 GHz with AMI 64Mbit SPI BIOS.

**Memory**
- 1x 204-Pin SO-DIMM DDR3L 1066 / 1333MHz (un-buffered and non-ECC), max. up to 8GB

**Ethernet**
- 2 x Intel® i210-AT GbE LAN Port, Support Wake-on-LAN and PXE

**Storage**
- 1x External 2.5" SATA HDD Bay
- 1x External CFast Socket
- 1x External SIM Card Socket

**I/O Ports**
- 1x VGA
- 1x DisplayPort
- 1x USB 3.0
- 3x USB 2.0
- 2x DB9 for COM1~2, Support RS232/422/485 with Auto Flow Control
- 8x Optical Isolated DIO (4x DI, 4x DO), 10-Pin Terminal Block, Support 9~30V
- 1x Line-out
- 1x Mic-in
- 1x Power Switch
- 1x Reset Button
- 1x AT/ATX Switch

**Expansion**
- 1x Full-size Mini PCIe Socket for Wi-Fi / GSM / Expansion Module
- 2x Universal I/O Bracket (CV-112/P1001E & CV-112H/P1001E Only)

**Other Features**
- Watchdog Timer: Software Programmable Supports 256 Levels System Reset
- Audio: AMP 2W + 2W (Internal Speaker)
- OSD Function: LCD On/Off, Brightness Up/Down

**Power Requirement**
- Support AT, ATX Mode
- 1x 3-pin Terminal Block Connector with Power Input 9~48VDC
- 1x Optional AC/DC 12V/5A, 60W Power Adapter

**Operating System**

Unit: mm
1.2.5 CV-W115/P1000

CV-W115R/P1000 | CV-W115C/P1000

Display
- LCD Size: 15.6" (16:9)
- Max. Resolution: 1366 x 768
- Brightness (cd/m2): 400
- Contrast Ratio: 500 : 1
- LCD Color: 16.2M
- Pixel Pitch (mm): 0.252 (H) x 0.252 (V)
- Viewing Angle (H-V): 170 / 160
- Backlight MTBF: 50000 hrs (LED Backlight)

Touch
- Resistive 5-wire Touch for CV-W115R/P1001 Only
- Projected Capacitive Touch for CV-W115C/P1001 Only

Environment
- Operating Temperature: Ambient with Air Flow: 0°C to 60°C (with Industrial Grade Peripherals)
- Storage Temperature: -20°C to 60°C
- Relative humidity: 80% RH @ 50°C (Non-Condensing)
- IP Level: IP 65 Compliant Front Panel

Physical
- Dimension (WxHxD):
  - CV-W115/P1001: 420 x 254 x 75 mm
  - CV-W115/P1001E: 420 x 254 x 97.5 mm
- Weight:
  - CV-W115/P1001: 5.59 kg
  - CV-W115/P1001E: 5.79 kg
- Construction Front Panel: Die-cast Flat Surface
- Mounting: Panel / VESA Mounting / *Rack Mounting (*with optional mounting kit)
Chapter 1: Product Introductions

Processor System
• Onboard Intel® Atom™ Processor E3845 Quad Core, 1.91 GHz with AMI 64Mbit SPI BIOS.

Memory
• 1x 204-Pin SO-DIMM DDR3L 1066 / 1333MHz (un-buffered and non-ECC), max. up to 8GB

Ethernet
• 2 x Intel® i210-AT GbE LAN Port, Support Wake-on-LAN and PXE

Storage
• 1x External 2.5" SATA HDD Bay
• 1x External CFast Socket
• 1x External SIM Card Socket

I/O Ports
• 1x VGA
• 1x DisplayPort
• 1x USB 3.0
• 3x USB 2.0
• 2x DB9 for COM1~2, Support RS232/422/485 with Auto Flow Control
• 8x Optical Isolated DIO (4x DI, 4x DO), 10-Pin Terminal Block, Support 9~30V
• 1x Line-out
• 1x Mic-in
• 1x Power Switch
• 1x Reset Button
• 1x AT/ATX Switch

Expansion
• 1x Full-size Mini PCIe Socket for Wi-Fi / GSM / Expansion Module
• 2x Universal I/O Bracket (CV-W115/P1001E Only)

Other Features
• Watchdog Timer: Software Programmable Supports 256 Levels System Reset
• Audio: AMP 2W + 2W (Internal Speaker)
• OSD Function: LCD On/Off, Brightness Up/Down

Power Requirement
• Support AT, ATX Mode
• 1x 3-pin Terminal Block Connector with Power Input 9~48VDC
• 1x Optional AC/DC 12V/5A, 60W Power Adapter

Operating System
• Windows® 10/8.1/7
• Linux® Kernel 3.x

Certification
• CE
• FCC Class A

1.3 System I/O

1.3.1 Front

**ATX Power on/off switch**
Press to power-on or power-off the system

**CFast and SIM card Slot**
Used to insert a CFast card and SIM card

**Antenna hole**
Used to connect an antenna for optional Mini-PCIe WiFi module

**External HDD Bay**
Used to insert a 2.5” HDD or SSD
1.3.2 Rear

**DC IN**
Used to plug a DC power input with terminal block

**Reset Button**
Used to reset the system

**Mic-in**
Used to connect a microphone

**Line-out**
Used to connect an external speaker

**USB 2.0 port**
Used to connect USB 2.0/1.1 device

**LAN port**
Used to connect the system to a local area network

**VGA**
Used to connect an analog VGA monitor

**COM port**
COM 1 supports RS232/422/485 serial device
1.3.3 Side (Left)

**USB 3.0 port**
Used to connect USB 3.0/2.0/1.1 device

**USB 2.0 port**
Used to connect USB 2.0/1.1 device

**Digital I/O Terminal Block**
The Digital I/O terminal block supports 4 digital input and 4 digital output

**AT/ATX mode select switch**
Used to select AT or ATX power mode

CV-100/P1001

CV-100/P1001E
1.3.4 Side (Right)

**COM port**
COM 2 supports RS232/422/485 serial device

**DisplayPort**
Used to connect a Display Port devices

**Power LED**
Indicates the power status of the system

**HDD LED**
Indicates the status of the hard drive

**OSD Function**

**LCD On/Off**
Press to turn-on or turn-off the display

**Increase Brightness**
Press to increase brightness of the screen

**Decrease Brightness**
Press to decrease brightness of the screen
1.3.5 Top

**VESPA Mounting Hole**

These are mounting holes for VESA mount (75x75mm and 100x100mm)
Chapter 2

Jumpers and Connectors
2.1 Jumpers Settings
When setting the jumpers, ensure that the jumper caps are placed on the correct pins. When the jumper cap is placed on both pins, the jumper is short. If you remove the jumper cap, or place the jumper cap on just one pin, the jumper is open. Refer to below for examples of the 2-pin and 3-pin jumpers when they are short (on) and open (off).

Two-Pin Jumpers

Chapter 3
System Setup
3.1 Removing the Top Cover

**WARNING**
In order to prevent electric shock or system damage, before removing the chassis cover, must turn off power and disconnect the unit from power source.

1. Loosen the 8 screws of front and rear panel, then place them aside.

2. Remove the cover from the chassis.

3. Place the top cover gently.
3.2 Installing a Half Size Mini PCIe Card

1. Locate the Mini PCIe socket.

2. Use two screws provided on bracket to fasten the module and bracket together.

3. Tilt the Mini PCIe module at 45 degree angle and insert it to the slot until the gold-pated connector of module contacted firmly with the slot.
4. Press the module down and use the two screws to fix the module.

3.3 Installing a Full Size Mini PCIe Card

1. Locate the Mini PCIe socket.

2. Tilt the Mini PCIe module at 45 degree angle and insert it to the slot until the gold-pated connector of module contacted firmly with the slot.
3. Press the module down and use the two screws to fix the module.

3.4 Installing Antennas

1. Remove the antenna hole covers at front panel.

2. Have antenna jack penetrate through the hole.
3. Put on the washer and fasten the nut with antenna jack.

4. Assemble the antenna and antenna jack together.

5. Attach the RF connector at the another end of the cable onto the module.
3.5 Installing a SO-DIMM

1. Locate SO-DIMM socket.

2. Tilt the SODIMM module at a 45 degree angle and insert it to SODIMM socket until the gold-pated connector of module contacted firmly with the socket.
3.6 Installing the Top Cover

1. Put on the cover.

2. Fasten the 8 screws to fix the cover.
### 3.7 Installing a SATA Hard Drive

1. Locate the removable HDD bay and loosen the 2 screws.

![Locate HDD bay](image)

2. Pull out the HDD bracket.

![Pull HDD bracket](image)

3. Make the PCB side of the HDD face up, place the HDD bracket on it. Ensure the direction of bracket is correct and use 4 provided screws to assemble HDD and HDD bracket together.

![Assemble HDD and bracket](image)
4. Align the HDD bracket with the entrance of HDD bay. And insert the HDD bracket until the connector of HDD contact the SATA connector firmly.

3.8 Installing a SIM Card

1. SIM card slot is at the front panel of the system.

2. Remove the mounting cover by unscrewing the two screws.

3. Insert the SIM card.
3.9 Installing a CFast Card

1. Locate the CFast card slot.

2. Remove the mounting cover by unscrewing the two screws.

3. Insert the CFast card.
3.10 Connecting with CV Display Module

1. Locate the module connector slot.

2. Turn over the unit to have the bottom side face up, loosen the 2 screws of the module connector bracket.

The photos shows the male connector (on display module) and female connector (on PC module)
3. Connect the modules.

4. Fasten the 6 screws onto the display module through the holes of the PC module.
Chapter 4

BIOS Setup
4.1 BIOS Introduction

The BIOS (Basic Input/Output System) is a program located on a Flash Memory on the motherboard. When you start the computer, the BIOS program will gain control. The BIOS first operates an auto-diagnostic test called POST (power on self test) for all the necessary hardware, it detects the entire hardware device and configures the parameters of the hardware synchronization.

**BIOS Setup**

Power on the computer and by pressing <Del> immediately allows you to enter Setup. If the message disappears before your respond and you still wish to enter Setup, restart the system to try again by turning it OFF then ON or pressing <Ctrl>, <Alt> and <Delete> keys.

### Control Keys

<table>
<thead>
<tr>
<th>Key</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;→&gt; &lt;←&gt;</td>
<td>Move to select screen</td>
</tr>
<tr>
<td>&lt;↑&gt; &lt;↓&gt;</td>
<td>Move to select item</td>
</tr>
<tr>
<td>&lt;Esc&gt;</td>
<td>Quit the BIOS Setup</td>
</tr>
<tr>
<td>&lt;Enter&gt;</td>
<td>Select item</td>
</tr>
<tr>
<td>&lt;Page Up/+&gt;</td>
<td>Increases the numeric value or makes changes</td>
</tr>
<tr>
<td>&lt;Page Down/-&gt;</td>
<td>Decreases the numeric value or makes changes</td>
</tr>
<tr>
<td>&lt;Tab&gt;</td>
<td>Select setup fields</td>
</tr>
<tr>
<td>&lt;F1&gt;</td>
<td>General help</td>
</tr>
<tr>
<td>&lt;F2&gt;</td>
<td>Previous value</td>
</tr>
<tr>
<td>&lt;F3&gt;</td>
<td>Load Optimized defaults</td>
</tr>
<tr>
<td>&lt;F7&gt;</td>
<td>Select boot device</td>
</tr>
<tr>
<td>&lt;F10&gt;</td>
<td>Save configuration and Exit</td>
</tr>
</tbody>
</table>

**Main Menu**

The main menu lists the setup functions you can make changes to. You can use the arrow keys (↑↓) to select the item. The on-line description of the highlighted setup function is displayed at the bottom of the screen.

**Sub-Menu**

If you find a right pointer symbol appears to the left of certain fields that means a sub-menu can be launched from this field. A sub-menu contains additional options for a field parameter. You can use arrow keys (↑↓) to highlight the field and press <Enter> to call up the sub-menu. Then you can use the control keys to enter values and move from field to field within a sub-menu. If you want to return to the main menu, just press the <Esc>.
4.2 Main Setup
Press <Del> to enter BIOS CMOS Setup Utility, the Main Menu (as shown below) will appear on the screen. Use arrow keys to move among the items and press <Enter> to accept or enter a sub-menu.

4.2.1 System Date
Set the date. Please use <Tab> to switch between date elements.

4.2.2 System Time
Set the time. Please use <Tab> to switch between time elements.
4.3 Advanced Setup

4.3.1 ACPI Settings
Enable or disable ACPI Auto Configuration.
### 4.3.2 Super IO Configuration

You can use this screen to select options for the Super IO Configuration, and change the value of the selected option.

#### Serial Port 1 Configuration

<table>
<thead>
<tr>
<th>Item</th>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Serial Port</td>
<td>Enabled</td>
<td>Enables or disables the serial port.</td>
</tr>
<tr>
<td>Device Settings</td>
<td>ID=3F8, IRQ=4</td>
<td>Sets the device ID and IRQ for the serial port.</td>
</tr>
<tr>
<td>Change Settings</td>
<td>Auto</td>
<td>Change the settings for the serial port.</td>
</tr>
<tr>
<td>Onboard Serial Port 1 Mode</td>
<td>RS232</td>
<td>Selects the serial port mode.</td>
</tr>
</tbody>
</table>

#### Serial Port Configuration

<table>
<thead>
<tr>
<th>Item</th>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Watchdog Mode</td>
<td>[Sec]</td>
<td>Sets the watchdog timer.</td>
</tr>
<tr>
<td>Watchdog Timer</td>
<td>0</td>
<td>Sets the watchdog timer settings.</td>
</tr>
<tr>
<td>Watchdog Count</td>
<td>N/A</td>
<td>Sets the watchdog count settings.</td>
</tr>
</tbody>
</table>

- **Serial Port**
  - This item will allow users to enable or disable serial port.

- **Onboard Serial Port 1 Mode**
  - Change the Serial interface. Select <RS232>, <RS422> or <RS485> interface.

- **Change Settings**
  - This setting is used to change the address & IRQ settings of the specified serial port.
■ Serial Port 2 Configuration
  ❑ Please see Serial Port 1 Configuration

■ Serial Port 3 Configuration
  ❑ Please see Serial Port 1 Configuration
  ❑ Serial port 3 configuration does not have Onboard Serial Port Mode, described in the previous two configurations.

■ Watch Dog Function
You can setup the system watch-dog timer, a hardware timer that generates a reset when the software that it monitors does not respond as expected each time the watch dog polls it.

❑ Watch Dog Mode
Change the Watch dog mode. Select <Sec> or <Min> mode.

❑ Watch Dog Timer
User can set a value in the range of 0 to 255.
### 4.3.3 Hardware Monitor

These items display the current status of all monitored hardware devices/components such as voltages and temperatures.

![Hardware Monitor Table]

**PC Health Status**

<table>
<thead>
<tr>
<th>Item</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPU temperature</td>
<td>+46 °C</td>
</tr>
<tr>
<td>System temperature</td>
<td>+42 °C</td>
</tr>
<tr>
<td>Vcore</td>
<td>+0.888 V</td>
</tr>
<tr>
<td>VGPU</td>
<td>+5.054 V</td>
</tr>
<tr>
<td>-3.3V</td>
<td>+3.424 V</td>
</tr>
<tr>
<td>+12V</td>
<td>+12.297 V</td>
</tr>
</tbody>
</table>

### 4.3.4 Serial Port Console Redirection

<table>
<thead>
<tr>
<th>Console Redirection Settings</th>
<th>[Disabled]</th>
</tr>
</thead>
<tbody>
<tr>
<td>COM1</td>
<td></td>
</tr>
<tr>
<td>COM2</td>
<td></td>
</tr>
</tbody>
</table>

**Console Redirection**

This item allows users to enable or disable console redirection.
## 4.3.5 CPU Configuration

### Socket 0 CPU Information
This section provides information on your CPU, frequency, and cache memory.

### Active Processor Cores
Change the active processor cores. Select <All> or <1> mode.

### Limit CPUID Maximum
This option is only useful if you are using an operating system that does not recognize all of the features of your processor.
- Allows user to determine whether to limit CPUID maximum value. Set this item to
  - Disabled: For Windows XP operating system.
  - Enabled: For legacy operating system such as Windows NT4.0. (Default: Disabled)

### Execute Disable Bit
Enables or disables Intel Execute Disable Bit function.

### Hardware Prefetcher
Enables or disables L2 Cache Hardware Prefetcher.

### Adjacent Cache Line Prefetch
Enables or disables L2 prefetching of adjacent cache lines.

### Intel Virtualization Technology
Enables or disables Intel Virtualization Technology. Virtualization enhanced by Intel Virtualization Technology will allow a platform to run multiple operating systems and applications in independent partitions. With virtualization, one computer system can function as multiple virtual systems.
4.3.6 Thermal Configuration

- **Critical Trip Point**
  Allows user to set the CPU temperature threshold. If the CPU temperature reaches this value, the operating system will shut down the system. This item is configurable only when DTS is enabled.

- **Passive Trip Point**
  Allows user to set the CPU temperature threshold. If the CPU temperature reaches this value, the CPU frequency will be automatically reduced. This item is configurable only when DTS is enabled.

- **DTS**
  Enables or disables the CPU overheating protection function. (Default: Disabled)
4.3.7 SATA Configuration

- **Serial-ATA (SATA)**
  This item will allow users to enable or disable Serial ATA.

- **SATA Mode**
  This item will allow users to select IDE or AHCI Mode.

- **Serial – ATA Port 0**
  This item will allow users to enable or disable Serial-ATA Port 0.

- **Serial – ATA Port 1**
  This item will allow users to enable or disable Serial-ATA Port 1.
4.3.8 OS Selection

This allows you to configure Windows OS version to install. The purpose of this is to enable USB 3.0 controller interface. If you set Windows 7 and install the OS, you will need to install USB 3.0 driver at the OS level to fully support USB 3.0 interfaces. If you set Windows 8.x and install it or later OS, the Windows OS will easily support USB 3.0 interfaces.

■ OS Selection

This allows to set Windows 8.x or Windows 7 (default).
4.3.9 Compatibility Support Module Configuration

- **CSM Support**
  Enables or disables UEFI CSM (Compatibility Support Module) to support a legacy PC boot process.

- **Boot option filter**
  Allows user to select which type of operating system to boot.
  - UEFI and Legacy: Allows booting from operating systems that support legacy option ROM or UEFI option ROM.
  - Legacy only: Allows booting from operating systems that only support legacy option ROM.
  - UEFI only: Allows booting from operating systems that only support UEFI option ROM.
  This item is configurable only when CSM Support is set to Enabled.

- **PXE Function**
  This item will allow users to enable or disable PXE function.

- **Storage**
  Allows user to select whether to enable the UEFI or legacy option ROM for the Storage device controller.
  - Do not launch: Disables option ROM.
  - UEFI only: Enables UEFI option ROM only.
  - Legacy only: Enables legacy option ROM only.

- **Video**
  Allows user to select whether to enable the UEFI or legacy option ROM for the Video device controller.
  - Do not launch: Disables option ROM.
  - UEFI only: Enables UEFI option ROM only.
  - Legacy only: Enables legacy option ROM only.
4.3.10 USB Configuration

- **Legacy USB Support**
  Allows USB keyboard/mouse to be used in MS-DOS.

- **XHCI Hand-off**
  Determines whether to enable XHCI (USB3.0) Hand-off feature for an operating system without XHCI (USB3.0) Hand-off support.

- **EHCI Hand-off**
  Determines whether to enable EHCI Hand-off feature for an operating system without EHCI Hand-off support.

- **USB Mass Storage Driver Support**
  Enables or disables support for USB storage devices.
### 4.4 Chipset

This section provides information on the installed memory size and memory/onboard graphics-related configuration options.

<table>
<thead>
<tr>
<th>North Bridge</th>
<th>North Bridge Parameters</th>
</tr>
</thead>
<tbody>
<tr>
<td>South Bridge</td>
<td></td>
</tr>
</tbody>
</table>

**4.4.1 North Bridge**

<table>
<thead>
<tr>
<th>Memory Information</th>
<th>Config Intel IOD Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Memory</td>
<td>DDR3L</td>
</tr>
<tr>
<td>Memory Slot0</td>
<td>8192 MB</td>
</tr>
</tbody>
</table>

++: Select Screen
T1: Select Item
Enter: Select
+-/: Change Opt.
F1: General Help
F2: Previous Values
F3: Optimized Defaults
F10: Save & Exit
ESC: Exit

## Intel IGD Configuration

This section provides onboard graphics-related configuration options.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>GOP Driver</td>
<td>This item will allow users to enable or disable GOP Driver.</td>
</tr>
<tr>
<td>Integrated Graphics Device</td>
<td>This item will allow users to enable or disable Integrated Graphics Device.</td>
</tr>
<tr>
<td>IGD Turbo Enable</td>
<td>This item will allow users to enable or disable IGD Turbo.</td>
</tr>
<tr>
<td>Primary Display</td>
<td>&quot;Auto or IGFX or PEG or PCIE or SG&quot; optimal to Primary Display.</td>
</tr>
<tr>
<td>GFX Boost</td>
<td>This item will allow users to enable or disable GFX Boost.</td>
</tr>
<tr>
<td>Aperture Size</td>
<td>Aperture size optimal between 128MB, 256MB, or 512MB.</td>
</tr>
<tr>
<td>DOP CG</td>
<td>This item will allow users to enable or disable DOP CG.</td>
</tr>
<tr>
<td>GTT Size</td>
<td>GTT size optimal between 1MB or 2MB.</td>
</tr>
<tr>
<td>IGD Thermal</td>
<td>This item will allow users to enable or disable IGD Thermal.</td>
</tr>
</tbody>
</table>
4.4.2 South Bridge

Azalia HD Audio
Control detection of the Azalia device.

Audio Controller
- Enabled: Azalia will be unconditionally enabled.
- Disabled: Azalia will be unconditionally disabled.

USB Configuration
- XHCI Mode
  This setting disables/enables the USB XHCI controller. The eXtensible Host Controller Interface (XHCI) is a computer interface specification that defines a register-level description of a Host Controller for Universal Serial Bus (USB), which is capable of interfacing to USB 1.0, 2.0, and 3.0 compatible devices. The specification is also referred to as the USB 3.0 Host Controller specification.

- USB 2.0 (EHCI) Support
  This setting disables/enables the USB EHCI controller. The Enhanced Host Controller Interface (EHCI) specification describes the register-level interface for a Host Controller for the Universal Serial Bus (USB) Revision 2.0.

- USB RMH Mode
  This item will allow users to enable or disable USB RMH Mode.

- USB Port
  - Port 0
    This item will allow users to enable or disable USB Port 0.
  - Port 1
    This item will allow users to enable or disable USB Port 1.
  - Port 2
    This item will allow users to enable or disable USB Port 2.
  - Port 3
    This item will allow users to enable or disable USB Port 3.

Wake On LAN Enable
This item enables or disables Wake On LAN (WOL) function.
Chapter 4: BIOS Setup

PCI Express Configuration

- **PCI Express Port 0**
  - This item will allow users to enable or disable PCI Express Port 0.
  - **Speed**
    - Change the PCI Express interface speed. Select <AUTO>, <Gen 2> or <Gen 1>

- **PCI Express Port 1**
  - This item will allow users to enable or disable PCI Express Port 1.
  - **Speed**
    - Change the PCI Express interface speed. Select <AUTO>, <Gen 2> or <Gen 1>

- **PCI Express Port 2**
  - This item will allow users to enable or disable PCI Express Port 2.
  - **Speed**
    - Change the PCI Express interface speed. Select <AUTO>, <Gen 2> or <Gen 1>

- **PCI Express Port 3**
  - This item will allow users to enable or disable PCI Express Port 3.
  - **Speed**
    - Change the PCI Express interface speed. Select <AUTO>, <Gen 2> or <Gen 1>

High Precision Timer

Enable or disable High Precision Event Timer (HPET) in the operating system.

Restore AC Power Loss

This setting specifies whether your system will reboot after a power failure or interrupt occurs. Available settings are:
- **Power Off**: Leave the computer in the power off state.
- **Power On**: Leave the computer in the power on state.
- **Last State**: Restore the system to the previous status before power failure or interrupt occurred.
4.5 Security

This section allows you to configure and improve your system and allows you to set up some system features according to your preference.

4.5.1 Administrator Password

Administrator Password controls access to the BIOS Setup utility.

4.5.2 User Password

User Password controls access to the system at boot and to the BIOS Setup utility.
4.6 Boot

This section allows you to configure the boot settings.

4.6.1 Setup Prompt Timeout

Use this item to set number of seconds to wait for setup activation key.

4.6.2 Bootup NumLock State

Select the Power-on state for Numlock.

4.6.3 Full Screen Logo Show

This item allows user to enable or disable full screen logo show.

4.6.4 Fast Boot

This item allows user to enable or disable Fast Boot option.

4.6.5 UEFI Boot

This item allows user to enable or disable UEFI Boot option.
4.7 Save & Exit

This section allows you to configure the boot settings.

<table>
<thead>
<tr>
<th>Main</th>
<th>Advanced</th>
<th>Chipset</th>
<th>Security</th>
<th>Boot</th>
<th>Save &amp; Exit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Save Changes and Reset</td>
<td>Discard Changes and Reset</td>
<td>Restore Defaults</td>
<td>Save as User Defaults</td>
<td>Restore User Defaults</td>
<td></td>
</tr>
</tbody>
</table>

**4.7.1 Save Changes and Reset**
This item allows user to reset system setup after saving changes.

**4.7.2 Discard Changes and Reset**
This item allows user to reset system setup without saving any changes.

**4.7.3 Restore Defaults**
This item allows user to restore/load default values for all the options.

**4.7.4 Save as User Defaults**
This item allows user to save the changes done so far as user defaults.

**4.7.5 Restore User Defaults**
This item allows user to restore the user defaults to all the options.
Chapter 5

Product Application
5.1 Digital I/O (DIO) application

This section describes DIO application of the product. The content and application development are better understood and implemented by well-experienced professionals or developers.

5.1.1 Digital I/O Programming Guide

5.1.1.1 Pins for Digital I/O for Cincoze P1001 series product

<table>
<thead>
<tr>
<th>Item</th>
<th>Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>GPIO74 (Pin107)</td>

</tbody>
</table>

5.1.1.2 Programming Guide

To program the Super I/O chip F81866A configuration registers, the following configuration procedures must be followed in sequence:

(1) Enter the Extended Function Mode
(2) Configure the configuration registers
(3) Exit the Extended Function Mode

The configuration register is used to control the behavior of the corresponding devices. To configure the register, use the index port to select the index and then write data port to alter the parameters. The default index port and data port are 0x4E and 0x4F, respectively. **To enable configuration, the entry key 0x87 must be written to the index port. To disable configuration, write exit entry key 0xAA to the index port.** Following is an example to enable configuration and to disable configuration by using debug.

- o 4e 87
- o 4e 87 (enable configuration)
- o 4e aa (disable configuration)
5.1.1.3 Relative Registers

To program the F81866A configuration registers, see the following configuration procedures.

### Logic Device Number Register (LDN) — Index 07h

<table>
<thead>
<tr>
<th>Bit</th>
<th>Name</th>
<th>R/W</th>
<th>Reset</th>
<th>Default</th>

</tr>
</tbody>
</table>
5.1.1.4 Sample Code in C Language

5.1.1.4.1 Control of GP74 to GP77 (DI1 ~ DI4)
#define AddrPort 0x4E
#define DataPort 0x4F

<Enter the Extended Function Mode>
WriteByte(AddrPort, 0x87)
WriteByte(AddrPort, 0x87) // Must write twice to enter Extended mode

<Select Logic Device>
WriteByte(AddrPort, 0x07)
WriteByte(dataPort, 0x06)
//Select logic device 06h

<Input Mode Selection> //Set GP74 to GP77 input Mode
WriteByte(AddrPort, 0x80) // Select configuration register 80h
WriteByte(DataPort, 0x0X)
//Set (bit 4~7) = 0 to select GP 74~77 as Input mode.

<input Value>
WriteByte(AddrPort, 0x82) // Select configuration register 82h
ReadByte(DataPort, Value) // Read bit 4~7(0xFx)= GP74 ~77 as High.

<Leave the Extended Function Mode>
WriteByte(AddrPort, 0xAA)
5.1.1.4.2 Control of GP80 to GP83 (DO1 ~ DO4)
#define AddrPort 0x4E
#define DataPort 0x4F

<Enter the Extended Function Mode>
WriteByte(AddrPort, 0x87)
WriteByte(AddrPort, 0x87) // Must write twice to enter Extended mode

<Select Logic Device>
WriteByte(AddrPort, 0x07)
WriteByte(DataPort, 0x06)
// Select logic device 06h

<Output Mode Selection> // Set GP80 to GP83 output Mode
WriteByte(AddrPort, 0x88) // Select configuration register 88h
WriteByte(DataPort, (0xXF))
// Set (bit 0~3) = 1 to select GP 80 ~83 as Output mode.

<Output Value>
WriteByte(AddrPort, 0x89) // Select configuration register 89h
WriteByte(DataPort, Value) // Set bit 0~3=(0/1) to output GP 80~83 as Low or High

<Leave the Extended Function Mode>
WriteByte(AddrPort, 0xAA)
### 5.1.1.5 Change base address - DIO base address (Cincoze default 0xA00)

<Enter the Extended Function Mode>

WriteByte(AddrPort, 0x87)
WriteByte(AddrPort, 0x87) // Must write twice to enter Extended mode

<Select Logic Device>
WriteByte(AddrPort, 0x07)
WriteByte(dataPort, 0x06)
// Select logic device 06h

WriteByte(AddrPort, 0x60) // Select configuration register 60h (High Byte address)
WriteByte(dataPort, 0x0A)

WriteByte(AddrPort, 0x61) // Select configuration register 61h (Low Byte address)
WriteByte(dataPort, 0x00)

<Leave the Extended Function Mode>
WriteByte(AddrPort, 0xAA)

**Note:** Cincoze DIO Port base address is 0x0A00h.

5.2 Digital I/O (DIO) Hardware Specification

- XCOM+ / 2XCOM+ : Isolated power in V+
- XCOM- / 2XCOM- : Isolated power in V-
- Isolated power in DC voltage : 9~30V

- 8x Digital Input (Source Type)

- Input Signal Voltage Level
  - Signal Logic 0 : XCOM+ = 9V, \textbf{Signal Low - V-} < 1V
  - XCOM+ > 9V, \textbf{V+ - Signal Low} > 8V
  - Signal Logic 1 : > XCOM+ - 3V

- Input Driving Sink Current :
  - Minimal : 1 mA
  - Normal : 5 mA

- 8x Digital Output (Open Drain)
  - DO Signal have to pull up resistor to XCOM+ for external device, the resistance will affect the pull up current
  - Signal High Level : Pull up resistor to XCOM+
  - Signal Low Level : = XCOM-
  - Sink Current: 1A (Max)
DIO1: Digital Input / Output Connector
Connector Type: Terminal Block 1X10 10-pin, 3.5mm pitch

Chapter 2: Jumpers and Connectors

External Output Circuit

- TTL Signal
- Protection Circuit
- Plus common
- Input Pin
- External power supply 9~30VDC
- Load
- XCOM+
- XCOM-
- Output Pin
- Board
- Minus common
- External device

Panel Mount Procedures
A.1 Mounting Solution Guide For Panel Mount

1. Accessories provided by Cincoze are as follows.

Before assembly, please prepare panel mount PPC and customer's fixture.

Panel Mount with customer's fixture (Front View)
2. All mounting kits displayed are to be inserted into holes.

3. Installation preparation and steps.

Panel mount side view with LVDS connector of CV series

Before Mounting Kits are installed
Chapter 2: System Setup

STEP 1
Position panel mount kits

STEP 2
Insert the panel mounting kit into bottom hole

STEP 3
Slide the kit toward back
4. Apply all mount kits to the rest of holes. And you have completed the panel mount installation, as shown below.

Tighten the screw forward until the front screw just touches the surface.
