## Revision

Revision	Description	Date
1.00	First Released	2026/01/15

## Copyright Notice

© 2026 by Cincoze Co., Ltd. All rights are reserved. No parts of this manual may be copied, modified, or reproduced in any form or by any means for commercial use without the prior written permission of Cincoze Co., Ltd. All information and specifications provided in this manual are for reference only and remain subject to change without prior notice.

## Acknowledgement

Cincoze is a registered trademark of Cincoze Co., Ltd. All registered trademarks and product names mentioned herein are used for identification purposes only and may be trademarks and/or registered trademarks of their respective owners.

## Disclaimer

This manual is intended to be used as a practical and informative guide only and is subject to change without notice. It does not represent a commitment on the part of Cincoze. This product might include unintentional technical or typographical errors. Changes are periodically made to the information herein to correct such errors, and these changes are incorporated into new editions of the publication.

## Declaration of Conformity

### FCC

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

### CE

The product(s) described in this manual complies with all application European Union (CE) directives if it has a CE marking. For computer systems to remain CE compliant, only CE-compliant parts may be used. Maintaining CE compliance also requires proper cable and cabling techniques.

## Product Warranty Statement

### Warranty

Cincoze products are warranted by Cincoze Co., Ltd. to be free from defect in materials and workmanship for 2 years from the date of purchase by the original purchaser. During the warranty period, we shall, at our option, either repair or replace any product that proves to be defective under normal operation. Defects, malfunctions, or failures of the warranted product caused by damage resulting from natural disasters (such as by lightening, flood, earthquake, etc.), environmental and atmospheric disturbances, other external forces such as power line disturbances, plugging the board in under power, or incorrect cabling, and damage caused by misuse, abuse, and unauthorized alteration or repair, and the product in question is either software, or an expendable item (such as a fuse, battery, etc.), are not warranted.

### RMA

Before sending your product in, you will need to fill in Cincoze RMA Request Form and obtain an RMA number from us. Our staff is available at any time to provide you with the most friendly and immediate service.

## ■ RMA Instruction

- Customers must fill in Cincoze Return Merchandise Authorization (RMA) Request Form and obtain an RMA number prior to returning a defective product to Cincoze for service.
- Customers must collect all the information about the problems encountered and note anything abnormal, and describe the problems on the "Cincoze Service Form" for the RMA number application process.
- Charges may be incurred for certain repairs. Cincoze will charge for repairs to products whose warranty period has expired. Cincoze will also charge for repairs to products if the damage resulted from acts of God, environmental or atmospheric disturbances, or other external forces through misuse, abuse, or unauthorized alteration or repair. If charges will be incurred for a repair, Cincoze lists all charges and will wait for the customer's approval before performing the repair.
- Customers agree to ensure the product or assume the risk of loss or damage during transit, to prepay shipping charges, and to use the original shipping container or equivalent.
- Customers can be sent back the faulty products with or without accessories (manuals, cables, etc.) and any components from the system. If the components were suspected as part of the problem, please note clearly which components are included. Otherwise, Cincoze is not responsible for the devices/parts.
- Repaired items will be shipped along with a "Repair Report" detailing the findings and actions taken.

## **Limitation of Liability**

Cincoze' liability arising out of the manufacture, sale, or supplying of the product and its use, whether based on warranty, contract, negligence, product liability, or otherwise, shall not exceed the original selling price of the product. The remedies provided herein are the customer's sole and exclusive remedies. In no event shall Cincoze be liable for direct, indirect, special or consequential damages whether based on contract of any other legal theory.

## Technical Support and Assistance

1. Visit the Cincoze website at [www.cincoze.com](http://www.cincoze.com) where you can find the latest information about the product.
2. Contact your distributor or our technical support team, or sales representative for technical support if you need additional assistance. Please have the following information ready before you call:
  - Product name and serial number
  - Description of your peripheral attachments
  - Description of your software (operating system, version, application software, etc.)
  - A complete description of the problem
  - The exact wording of any error messages

## Conventions Used in this Manual

**WARNING**  
(AVERTIR)

This indication alerts operators to an operation that, if not strictly observed, may result in severe injury.

(Cette indication avertit les opérateurs d'une opération qui, si elle n'est pas strictement observée, peut entraîner des blessures graves.)

**CAUTION**  
(ATTENTION)

This indication alerts operators to an operation that, if not strictly observed, may result in safety hazards to personnel or damage to equipment.

(Cette indication avertit les opérateurs d'une opération qui, si elle n'est pas strictement observée, peut entraîner des risques pour la sécurité du personnel ou des dommages à l'équipement.)

**NOTE**  
(NOTE)

This indication provides additional information to complete a task easily.

(Cette indication fournit des informations supplémentaires pour effectuer facilement une tâche.)

## Safety Precautions

Before installing and using this device, please note the following precautions.

1. Read these safety instructions carefully.
2. Keep this User's Manual for future reference.
3. Disconnect this equipment from any AC outlet before cleaning.
4. For plug-in equipment, the power outlet socket must be located near the equipment and must be easily accessible.
5. Keep this equipment away from humidity.
6. Put this equipment on a reliable surface during installation. Dropping it or letting it fall may cause damage.
7. Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.
8. Use a power cord that has been approved for use with the product and that matches the voltage and current marked on the product's electrical range label. The voltage and current rating of the cord must be greater than the voltage and current rating marked on the product.
9. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
10. All cautions and warnings on the equipment should be noted.
11. If the equipment is not used for a long time, disconnect it from the power source to avoid damage from transient overvoltage.
12. Never pour any liquid into an opening. This may cause fire or electrical shock.
13. Never open the equipment. For safety reasons, the equipment should be opened only by qualified service personnel.

If one of the following situations arises, get the equipment checked by service personnel:

- The power cord or plug is damaged.
  - Liquid has penetrated into the equipment.
  - The equipment has been exposed to moisture.
  - The equipment does not work well, or you cannot get it to work according to the user's manual.
  - The equipment has been dropped and damaged.
  - The equipment has obvious signs of breakage.
14. CAUTION: Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer.
  15. Equipment intended only for use in a RESTRICTED ACCESS AREA.
  16. Ensure to connect the power cord of the power adapter to a socket-outlet with an earth connection.
  17. Dispose of used batteries promptly. Keep away from children. Do not disassemble and do not dispose of in fire.

## Package Contents

Before installation, please ensure all the items listed in the following table are included in the package.

Item	Description	Q'ty
1	CV-221C/P1101 Series Panel PC	1
2	DIO Terminal Block Connector (Female)	1
3	Thermal Pad (for CPU Thermal Block)	1
4	Power Terminal Block Connector (Female)	1
5	Screw Pack	1
6	Remote Power On/Off Terminal Block Connector	1
7	Panel Mounting Kit	14

*Note: Notify your sales representative if any of the above items are missing or damaged.*

## Ordering Information

### Available Models

Model No.	Product Description
CV-221C-R10/ P1101-E50-R11	21.5" FHD 16:9 Slim Bezel Panel PC with Intel® Atom® E3950 Quad-Core Embedded Computer, Projected Capacitive Touch, and AG Coating
CV-221C-R10/ P1101-N42-R11	21.5" FHD 16:9 Slim Bezel Panel PC with Intel® Pentium® N4200 Quad-Core Embedded Computer, Projected Capacitive Touch, and AG Coating

# **Chapter 1**

## **Product Introductions**

## 1.1 Overview

The CV-200 / P1101 series is an entry-level slim-bezel modular industrial panel PC, powered by Intel® Atom®/Pentium® processors. It supports up to three independent displays (VGA and DisplayPort) and offers a rich set of I/O interfaces. It's equipped with 2× Mini PCIe slots and 1× SIM card slot, enabling a variety of wireless communication applications. Supporting Full HD resolution and available in sizes from 10" to 21.5", its industrial-grade rugged design makes it well suited for deployment in demanding industrial environments.

### Key Features

- 21.5" Full HD LCD (1920 x 1080) with 16:9 Aspect Ratio
- Projected Capacitive Touch with Anti-Glare Coating.
- Wide Viewing Angle of 178°/178°
- Onboard Intel® Atom® / Pentium® Processor
- Supports Triple Independent Display
- 2x Full Size Mini-PCIe Expansion Socket
- Designed with Rugged Aluminum Die-casting Front Bezel
- Front Panel IP66 Compliant

### Certifications

### Entry-Level Industrial Computing

Equipped with Intel® Atom®/Pentium® processors, providing sufficient performance for basic HMI and control applications.

### CDS Patented Technology

Cincoze Convertible Display System (CDS) patented technology makes field-side maintenance and future upgrades easier. Replacing a display or improving system performance only requires replacing a single component, which significantly cuts upgrade costs.

## Ultra-Slim Bezel

With an ultra-slim bezel of  $\leq 3$  mm (varies by display size), the CV-200 minimizes physical constraints for compact installations. It's ideal for space-limited enclosures and applications requiring efficient integration with a streamlined appearance.

## Reliable Touch Performance

All models support P-Cap touch, anti-glare (AG) coating, and wet tracking technology, ensuring stable operation and clear visibility even in humid environments or under bright indoor lighting.

## Wide Temps, Safe, & More Reliable

To face harsh and rugged usage environments, the CV-200/P1101 series has a series of industrial-grade protections, including a wide operating temperature range, a wide range DC power input (9 to 48VDC), and a dustproof/water resistant IP66 front panel, which is beneficial for applications such as field-side HMI or production process visualization.

9 - 48VDC

IP66

## 1.2 Specifications

### 1.2.1 CV-221C/P1101 Series

Model Name	CV-221C
<b>Display</b>	
LCD Size	• 21.5" (16:9)
Max. Resolution	• 1920 x 1080
Brightness (cd/m2)	• 300
Contrast Ratio	• 5000:1
LCD Color	• 16.7M
Pixel Pitch (mm)	• 0.24825 (H) x 0.24825 (V)
Viewing Angle (V-H)	• 178 / 178
Backlight LED Life Time	• 50,000 hrs (LED Backlight)
<b>Touch Screen</b>	
Touch Type	• Projected Capacitive
Anti-Glare	✓
Wet Touch Tracking	✓
<b>Physical</b>	
Dimension ( W x D x H )	• 522.4 x 318.3 x 63.4 mm
Weight Information	• 5.28 kg
Mechanical Construction	• Die-Cast Flat Surface
<b>Power</b>	
Power Consumption	• 24.8 W (Max.)
<b>Environment</b>	
Front Panel Protection	• IP 66 Compliant
Operating Temperature	• 0°C - 60°C (32°F to 140°F) - with Industrial Grade peripherals; Ambient with air flow
Storage Temperature	• -20°C - 60°C (-4°F to 140°F)
Relative Humidity	• 90% RH @ 40°C (non-condensing)
EMC	• CE, UKCA, FCC, ICES-003 Class A
EMI	<ul style="list-style-type: none"> <li>• CISPR 32 Conducted &amp; Radiated: Class A</li> <li>• EN/BS EN 55032 Conducted &amp; Radiated: Class A</li> <li>• EN/BS EN 50121-3-2 Conducted &amp; Radiated: Class A</li> <li>• EN/BS EN IEC 61000-3-2 Harmonic current emissions: Class A</li> <li>• EN/BS EN61000-3-3 Voltage fluctuations &amp; flicker</li> <li>• FCC 47 CFR Part 15B, ICES-003 Conducted &amp; Radiated: Class A</li> </ul>
EMS	• EN/IEC 61000-4-2 ESD: Contact: 6 kV; Air: 8 kV

	<ul style="list-style-type: none"> <li>• EN/IEC 61000-4-3 RS: 80 MHz to 1000 MHz: 20 V/m</li> <li>• EN/IEC 61000-4-4 EFT: AC Power: 2 kV; DC Power: 1 kV; Signal: 2 kV</li> <li>• EN/IEC 61000-4-5 Surges: AC Power: 2 kV; Signal: 1 kV</li> <li>• EN/IEC 61000-4-6 CS: 10V</li> </ul> <p>(**Compliant with the standard when utilizing shielded cable.)</p> <ul style="list-style-type: none"> <li>• EN/IEC 61000-4-8 PFMF: 50/60 Hz, 30A/m</li> <li>• EN/IEC 61000-4-11 (50/60 Hz): Voltage dips duration up to 25/30 cycles; interruptions up to 250/300 cycles</li> </ul>

Mic-in	<ul style="list-style-type: none"> <li>• 1x Mic-in, Phone Jack 3.5mm</li> </ul>
<b>I/O</b>	
LAN	<ul style="list-style-type: none"> <li>• 2x GbE LAN (Supports WoL, Teaming, Jumbo Frame &amp; PXE), RJ45 <ul style="list-style-type: none"> <li>- GbE1: Intel® I210</li> <li>- GbE2: Intel® I210</li> </ul> </li> </ul>
USB	<ul style="list-style-type: none"> <li>• 4x USB 3.2 Gen1 (Type A)</li> </ul>

Serial Port	• 4x RS-232/422/485 with Auto Flow Control Support 5V/12V, DB9
DIO	• 8x Digital I/O (4in/4out), 10-Pin Terminal Block
<b>Storage</b>	
SSD/HDD	• 1x 2.5" SATA HDD Bay (SATA3.0)
SIM Socket	• 1x SIM Socket
mSATA	• 1x mSATA Socket (SATA 3.0, Shared by Mini-PCle Socket)
<b>Expansion</b>	
Mini PCI Express	• 2x Full-size Mini PCIe Sockets
CFM (Control Function Module) Interface	<ul style="list-style-type: none"> <li>• Optional CFM IGN Module for Power Ignition Function</li> <li>• Optional CFM PoE Module for Power over Ethernet Function</li> </ul>
CDS (Convertible Display System) Technology	• 1x Convertible Display System (CDS) Interface
Antenna Holes	• 4x Antenna Holes
<b>Other Function</b>	
Instant Reboot	• Support 0.2sec
Watchdog Timer	• Software Programmable Supports 256 Levels System Reset
Internal Speaker	• AMP 2W + 2W
OSD Function	• LCD On/Off, Brightness Up, Brightness Down
Clear CMOS Switch	• 1x Clear CMOS Switch
Reset Button	• 1x Reset Button
<b>Power</b>	
Power Switch	• 1x Power Switch
Power Mode Switch	• 1x AT/ ATX Mode Switch
Power Input	• 1x 3-pin Terminal Block Connector with Power Input 9-48VDC
Power Adapter (Optional)	• 1x Optional AC/DC 12V/5A, 60W or 24V/5A 120W
Remote Power On/Off	• 1x Remote Power On/off Connector, 2-pin Terminal Block
<b>Physical</b>	
Dimension ( W x D x H )	• 204.5 x 149 x 41.5 mm
Weight Information	• 1.49kg
Mechanical Construction	• Extruded Aluminum with Heavy Duty Metal
Physical Design	<ul style="list-style-type: none"> <li>• Fanless Design</li> <li>• Jumper-less Design</li> </ul>
Mounting	• Wall / VESA / CDS / DIN Mounting
<b>Reliability &amp; Protection</b>	
Reverse Power Input	• Yes
Over Voltage Protection	<ul style="list-style-type: none"> <li>• Protection Range: 51-58V</li> <li>• Protection Type: shut down operating voltage, re-power on at the present level to recover</li> </ul>
Over Current Protection	• 15A

CMOS Battery Backup	<ul style="list-style-type: none"> <li>• SuperCap Integrated for CMOS Battery Maintenance-free Operation</li> </ul>

## PWR\_SW2: Remote Power On/Off Connector

Pin	Definition
1	GND
2	PWR_SW

**WARNING**

**Do not apply power to this connector!  
This port is used to connect a SWITCH!**

## DC\_IN1: DC Power Input Connector (+9~48V)

Connector Type: Terminal Block 1x3 3-pin, 5.0mm pitch

Pin	Definition
1	+9~48V IN
2	Ignition (IGN)
3	GND

**CAUTION**

**Please disconnect the power source before mounting the DC power cables or connecting the DC power connector to system.**

## LAN1 / LAN2: LAN LED Status Definition

Act LED Status	Definition
Blinking Yellow	Data Activity
Off	No Activity

Link LED Status	Definition
Steady Green	1Gbps Network Link
Steady Orange	100Mbps Network Link
Off	10Mbps Network Link

## COM1\_1 / COM2\_1 / COM3\_1 / COM4\_1: RS232 / RS422 / RS485 Connector

Connector Type: 9-pin D-Sub

Pin	RS232 Definition	RS422 / 485 Full Duplex Definition	RS485 Half Duplex Definition
1	DCD	TX-	DATA -
2	RXD	TX+	DATA +
3	TXD	RX+	
4	DTR	RX-	
5	GND		
6	DSR		
7	RTS		
8	CTS		
9	RI		

Power over Serial PIN Definitions			
Pin	RS232	RS422/485	RS485
5	GND	GND	GND
9	0/5/12V	0/5/12V	0/5/12V

## POWER1/ POWER2: Power Connector

Connector Type: 1x4 4-pin Wafer, 2.0mm pitch

Pin	Definition
1	+5V
2	GND
3	GND
4	+12V

# **Chapter 3**

## **System Setup**

## 3.1 Removing Top Cover

### WARNING

In order to prevent electric shock or system damage, before removing the chassis cover, must turn off power and disconnect the unit from power source.

1. Loosen the 8 screws of front and rear panel, then place them aside.

2. Remove the cover from the chassis.

3. Place the top cover gently.

## 3.2 Installing SO-DIMM Memory

1. Locate the SO-DIMM sockets.

2. Tilt the SO-DIMM module at a 45-degree angle and insert it to SO-DIMM socket until the gold-pated connector of module contacted firmly with the socket.

3. Press the modules down until it's fixed firmly by the two locking latches on each side.

### 3.3 Installing Mini-PCle Card

(Applicable for full or half size card)

1. Locate the Mini PCIe slot.

2. Insert the Mini-PCle card at a 45-degree angle and insert it to the slot until the gold-pated connector of module contacted firmly with the slot.

3. Press down the module and fasten two screws to secure the module.

4. If you have a Half-size Mini-PCIe card, make sure use extender to make it Full-size as shown below.

### 3.4 Installing Antenna(s)

CAUTION

Please installing a Mini PCIe Wireless Lan Card on top side before you put on washer and fasten the nut with antenna jack.

1. Remove the antenna hole covers at front panel.

2. Have antenna jack penetrate through the hole.

3. Put on washer and fasten the nut with antenna jack.

4. Assemble the antenna and antenna jack together.

5. Attach the RF connector at another end of cable onto the module.

## 3.5 Installing CPU Thermal Pad

1. Place the thermal pad on the CPU heatsink.

CAUTION

Before assembling the system's chassis cover, please make sure the protective film on the Thermal Pad has been removed!

## 3.6 Installing Top Cover

1. Put on the cover.

2. Fasten the 8 screws to fix the cover.

## 3.7 Installing SATA Hard Drive

1. Loosen 2 screws on front panel to remove cover plate.

2. Turn over the unit to have the bottom side face up and loosen 1 screw.

3. Pull out the HDD bracket.

4. Make the bottom side of the HDD face up, place the HDD bracket on it. Ensure the direction of bracket is correct and use 4 provided screws to assemble HDD and HDD bracket together.

5. Align the HDD bracket with the entrance of HDD bay. And insert the HDD bracket until the connector of HDD contact the SATA connector firmly.

## 3.8 Installing SIM Card

1. Loosen 2 screws on front panel to remove cover plate.

2. SIM card slot is at the front panel of the system.

3. Insert the SIM card.

# **Chapter 4**

## **BIOS Setup**

## 4.1 BIOS Introduction

The BIOS (Basic Input/ Output System) is a program located on a Flash Memory on the motherboard. When you start the computer, the BIOS program will gain control. The BIOS first operates an auto-diagnostic test called POST (power on self-test) for all the necessary hardware, it detects the entire hardware device and configures the parameters of the hardware synchronization.

### BIOS Setup

Power on the computer and by pressing <Del> immediately allows you to enter Setup. If the message disappears before your respond and you still wish to enter Setup, restart the system to try again by turning it OFF then ON or pressing <Ctrl>, <Alt> and <Delete> keys.

Control Keys	
<←> <→>	Move to select screen
<↑> <↓>	Move to select item
<Esc>	Quit the BIOS Setup
<Enter>	Select item
<Page Up/+>	Increases the numeric value or makes changes
<Page Down/->	Decreases the numeric value or makes changes
<Tab>	Select setup fields
<F1>	General help
<F2>	Previous value
<F3>	Load Optimized defaults
<F10>	Save configuration and Exit

### Main Menu

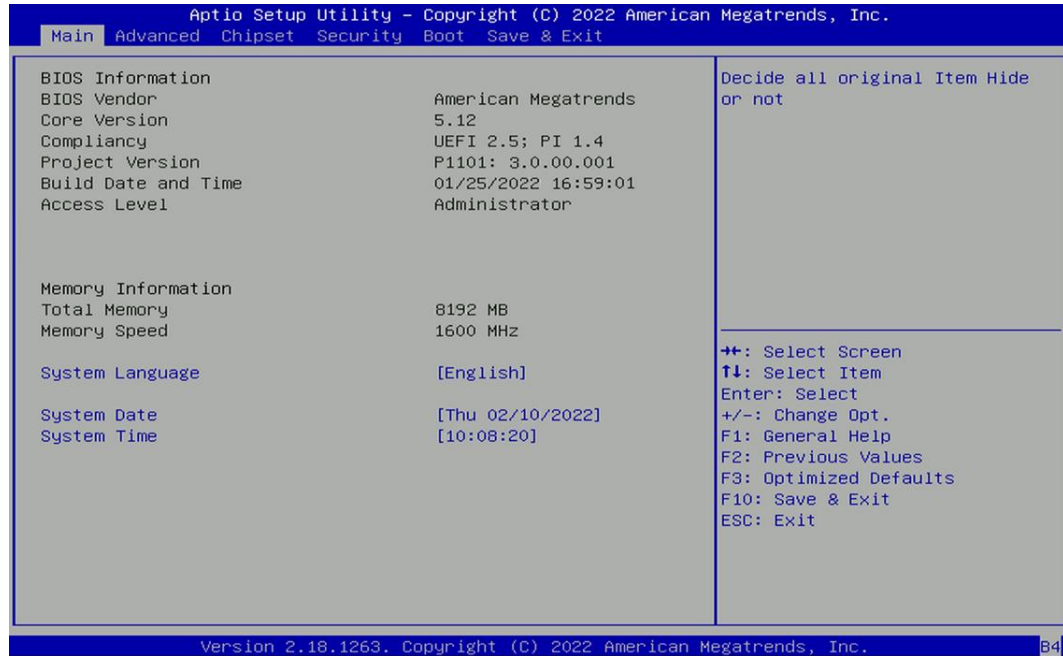

The main menu lists the setup functions you can make changes to. You can use the arrow keys ( ↑↓ ) to select the item. The on-line description of the highlighted setup function is displayed at the bottom of the screen.

### Sub-Menu

If you find a right pointer symbol appears to the left of certain fields that means a sub-menu can be launched from this field. A sub-menu contains additional options for a field parameter. You can use arrow keys ( ↑↓ ) to highlight the field and press <Enter> to call up the sub-menu. Then you can use the control keys to enter values and move from field to field within a sub-menu. If you want to return to the main menu, just press the <Esc>.

## 4.2 Main Setup

Press <Del> to enter BIOS CMOS Setup Utility, the Main Menu (as shown below) will appear on the screen. Use arrow keys to move among the items and press <Enter> to accept or enter a sub-menu.

### 4.2.1 System Date

Set the date. Please use <Tab> to switch between date elements.

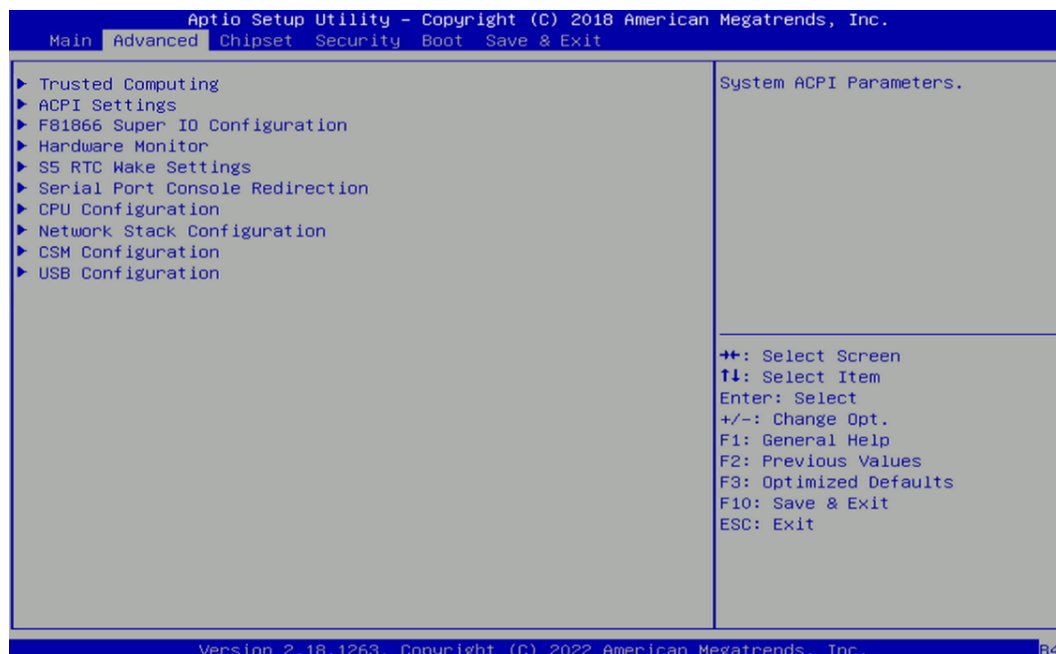

### 4.2.2 System Time

Set the time. Please use <Tab> to switch between time elements.

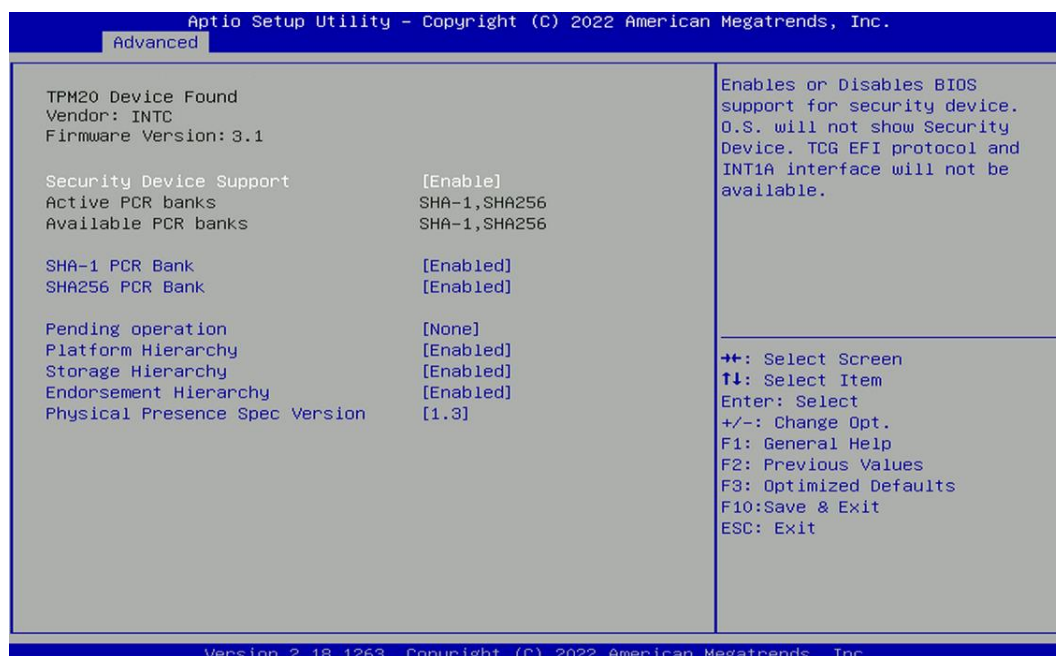

## 4.3 Advanced Setup

This section allows you to configure and improve your system and allows you to set up some system features according to your preference.

### 4.3.1 Trusted Computing Settings

#### ■ Security Device Support [Enabled]

Enables or disables Security Device Support function.

#### ■ SHA-1 PCR Bank [Enabled]

Enables or disables SHA-1 PCR Bank function.

### ■ SHA256 PCR Bank [Enabled]

Enables or disables SHA256 PCR Bank function.

### ■ Pending Operation [None]

Allows you to select which mode Pending Operation will operate.

Configuration options: [None], [TPM Clear]

### ■ Platform Hierarchy [Enabled]

Enables or disables Platform Hierarchy function.

### ■ Storage Hierarchy [Enabled]

Enables or disables Storage Hierarchy function.

### ■ Endorsement Hierarchy [Enabled]

Enables or disables Endorsement Hierarchy function.

### ■ Physical Presence Spec Version [1.3]

Allows you to select which mode Physical Presence Spec Version will operate.

Configuration options: [1.2], [1.3]

## 4.3.2 ACPI Settings

### ■ Enable ACPI Auto Configuration [Disabled]

Enables or disables BIOS Advanced Configuration Power Interface® (ACPI) auto configuration.

### ■ Enable Hibernation [Enabled]

Enables or disables system ability to hibernate state (OS/S4 state). This option may not be effective with some OS.

### ■ ACPI Sleep State [S3 (Suspend to RAM)]

Allows users to select the highest Advanced Configuration Power Interface® (ACPI) sleep state that system will enter when suspend button is pressed.

[Suspend Disabled]: Disables entering suspend state.  
 [S3 (suspend to RAM)]: Enables suspend to RAM state.

### ■ Lock Legacy Resources [Enabled]

Enables or disables Lock Legacy Resources.

### 4.3.3 F81866 Super IO Configuration

Set Parameters of Serial Ports. User can Enable/Disable the serial port and Select an optimal setting for the Super IO Device.

### ■ Serial Port 1~4 Configuration.

☐ **Serial Port [Enabled]**

Enables or disables serial port.

☐ **Change Settings [Auto]**

Allows you to change the IO Address & IRQ settings of the specified serial port.

☐ **Onboard Serial Port 1~6 Mode [RS232]**

Allows you to select Serial Port Mode.

Configuration options: [RS232] [RS422/RS485 Full Duplex] [RS485 Half Duplex]

☒ **Watch Dog [Disabled]**

Enables or disables watch dog function.

☒ **Watch Dog Mode [Sec]**

Allows to set watchdog timer unit <Sec> or <Min>.

☒ **Watch Dog Timer [0]**

Allows you to set watchdog timer's value in the range of 0 to 255.

#### 4.3.4 Hardware Monitor

This screen displays the current status of all monitored hardware devices/components such as voltages, temperatures.

### 4.3.5 S5 RTC Wake Settings

#### Wake system from S5 [Disabled]

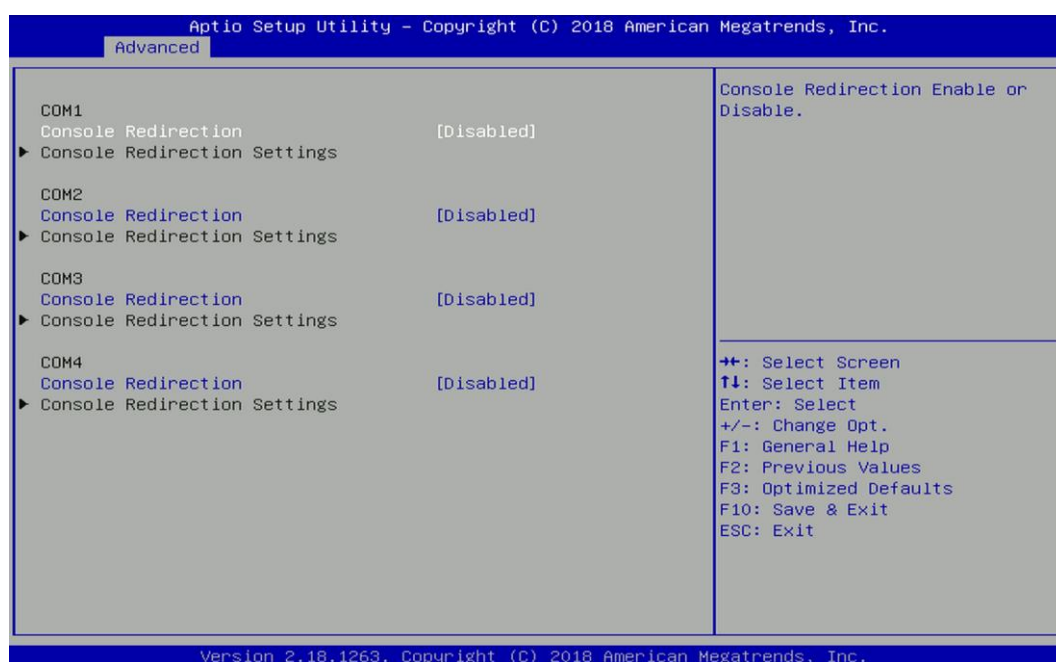

Enables or disables wake system from S5 (soft-off state).

[Disabled]: Disables wake system from S5.

[Fixed Time]: Sets a fixed time (HH:MM:SS) to wake system from S5.

[Dynamic Time]: Sets an increase minute(s) from current time to wake system from S5.

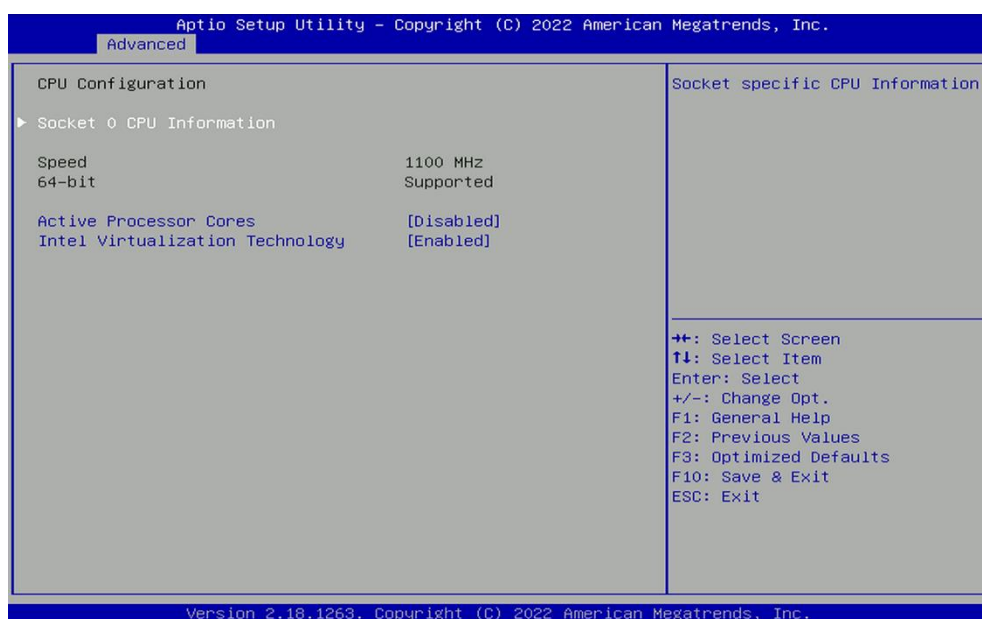

### 4.3.6 Serial Port Console Redirection

#### Console Redirection [Disabled]

Allow users to enable or disable COM1, COM2, COM3, COM4 console redirection function.

### 4.3.7 CPU Configuration

#### ■ Socket 0 CPU Information

This section provides information on your CPU, frequency, and cache memory.

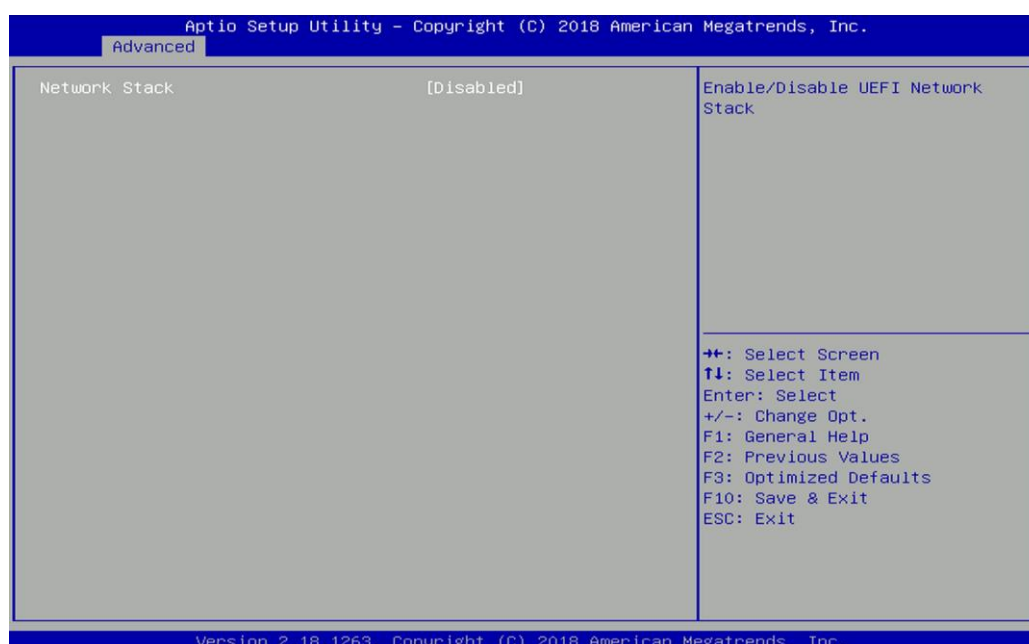

#### ■ Active Processor Cores [Enabled]

Number of cores to enable in each processor package.

#### ■ Intel Virtualization Technology [Enabled]

Enables or disables Intel Virtualization Technology. Virtualization enhanced by Intel Virtualization Technology will allow a platform to run multiple operating systems and applications in independent partitions. With virtualization, one computer system can function as multiple virtual systems.

### 4.3.8 Network Stack Configuration

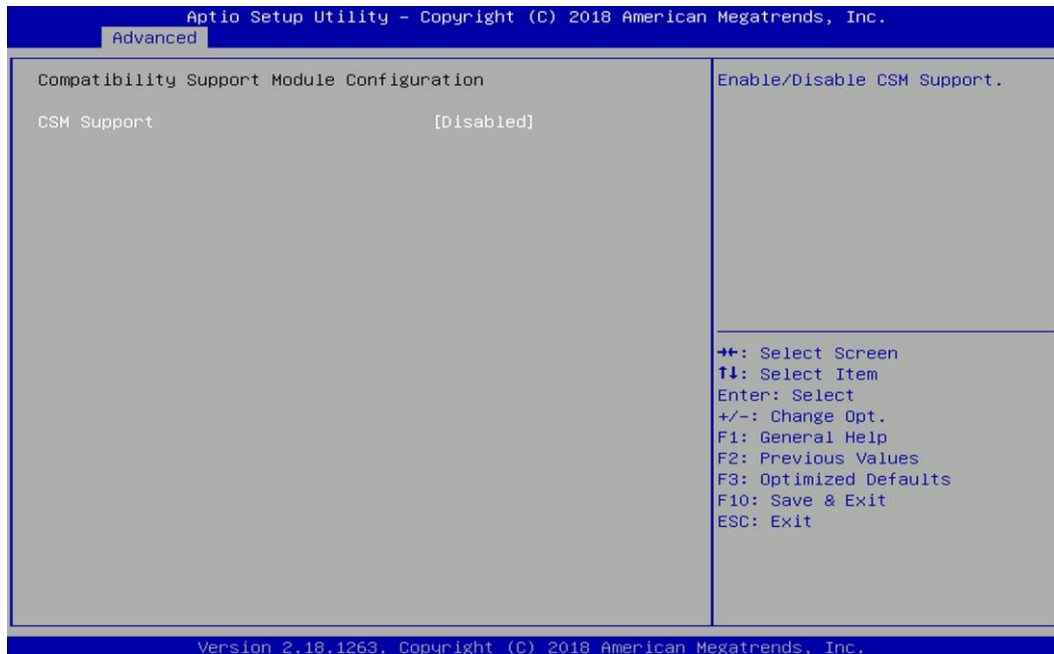

### ■ Network Stack [Disabled]

Enables or disables UEFI Network Stack.

### 4.3.9 CSM Configuration

This option controls legacy/UEFI ROMs priority.

### ■ CSM Support [Disabled]

Enables or disables compatibility support module.

### ■ Boot option filter [UEFI and Legacy]

Allows you to select which type of operating system to boot.

[UEFI and Legacy]: Allows booting from operating systems that support legacy option ROM or UEFI option ROM.

[Legacy only]: Allows booting from operating systems that only support legacy option ROM.

[UEFI only]: Allows booting from operating systems that only support UEFI option ROM.

### ■ Network PXE [Do not launch]

Controls the execution of UEFI and Legacy PXE (Network Preboot eXecution Environment) option ROM.

[Do not launch]: Disables option ROM execution.

[UEFI]: Enables UEFI option ROM only.

[Legacy]: Enables legacy option ROM only.

### ■ Storage [UEFI]

Controls the execution of UEFI and Legacy Storage option ROM.

[Do not launch]: Disables option ROM execution.

[UEFI]: Enables UEFI option ROM only.

[Legacy]: Enables legacy option ROM only.

### ■ Video [UEFI]

Controls the execution of UEFI and Legacy Video option ROM.

[Do not launch]: Disables option ROM execution.

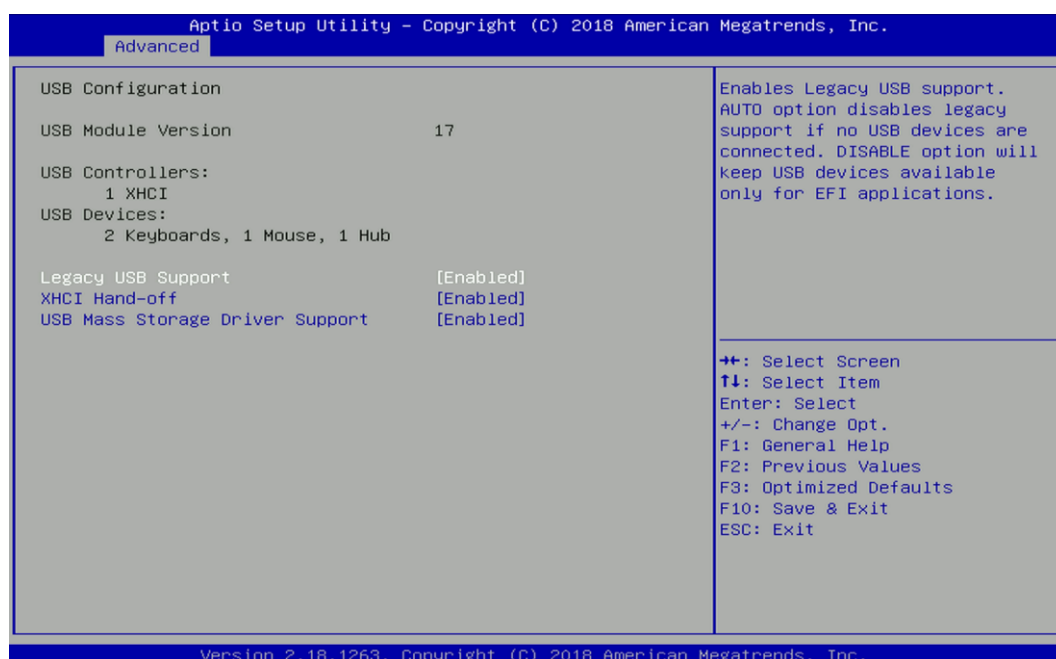

[UEFI]: Enables UEFI option ROM only.

[Legacy]: Enables legacy option ROM only.

#### ■ Other PCI devices [Do not launch]

Allows users to determine option ROM execution policy for device other than network, storage, or video.

### 4.3.10 USB Configuration

#### ■ Legacy USB Support [Enabled]

This item allows you to enable or disable legacy USB support. When set to [Auto], legacy USB support will be disabled automatically if no USB devices are connected.

#### ■ XHCI Hand-off [Enabled]

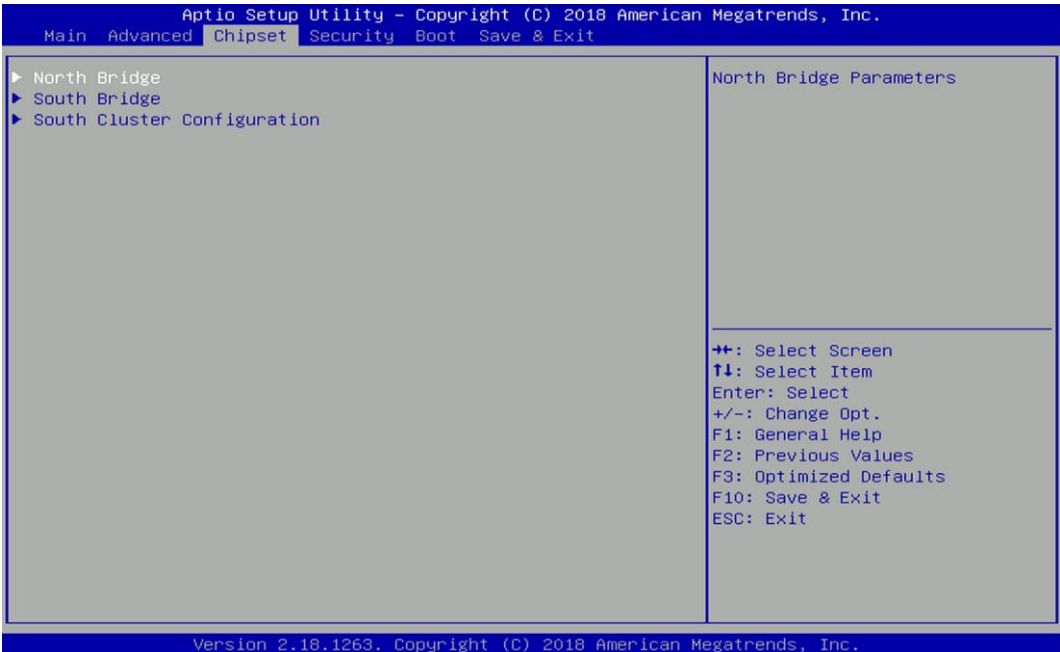

Enables or disables XHCI (USB3.0) hand-off function. Use this feature as a workaround for operating systems without XHCI hand-off support.

#### ■ USB Mass Storage Driver Support [Enabled]

Enables or disables USB mass storage driver support.

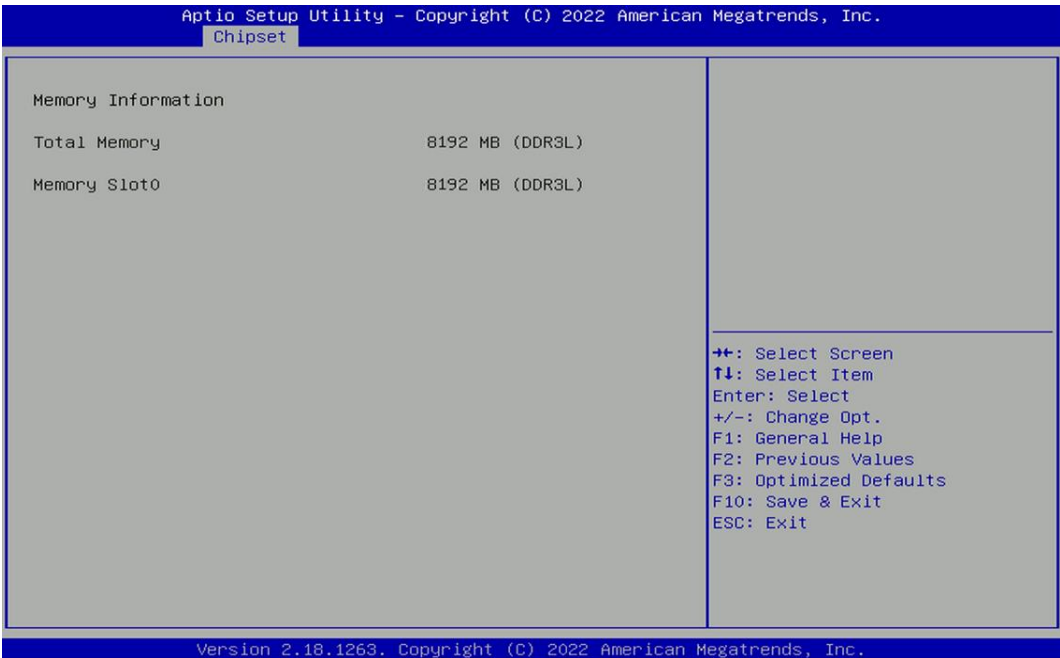

# 4.4 Chipset Setup

This section allows you to configure chipset related settings according to user’s preference.

## 4.4.1 North Bridge

This section provides information on the installed memory size and memory/onboard graphics-related configuration options.

## 4.4.2 South Bridge

### ■ OS Selection [Windows]

Allows you to configure Operating System version to install.

Configuration options: [Windows] [Intel Linux]

### ■ Mini PCIE1/USB3 Switch [Mini PCIE]

Allows you to change **Mini PCIE1** as [Mini PCIE] or [USB3].

### ■ Mini PCIE2/mSATA Switch [Mini PCIE]

Allows you to change **Mini PCIE2** as [Mini PCIE] or [mSATA].

### ■ Amplifier Function [Enabled]

Enables or disables Amplifier Function.

### ■ PSE Enable Selection [Enabled]

Enables or disables PSE (Power Sourcing Equipment).

### ■ LAN1 [Enabled]

Enables or disables LAN1 Controller.

### ■ LAN2 [Enabled]

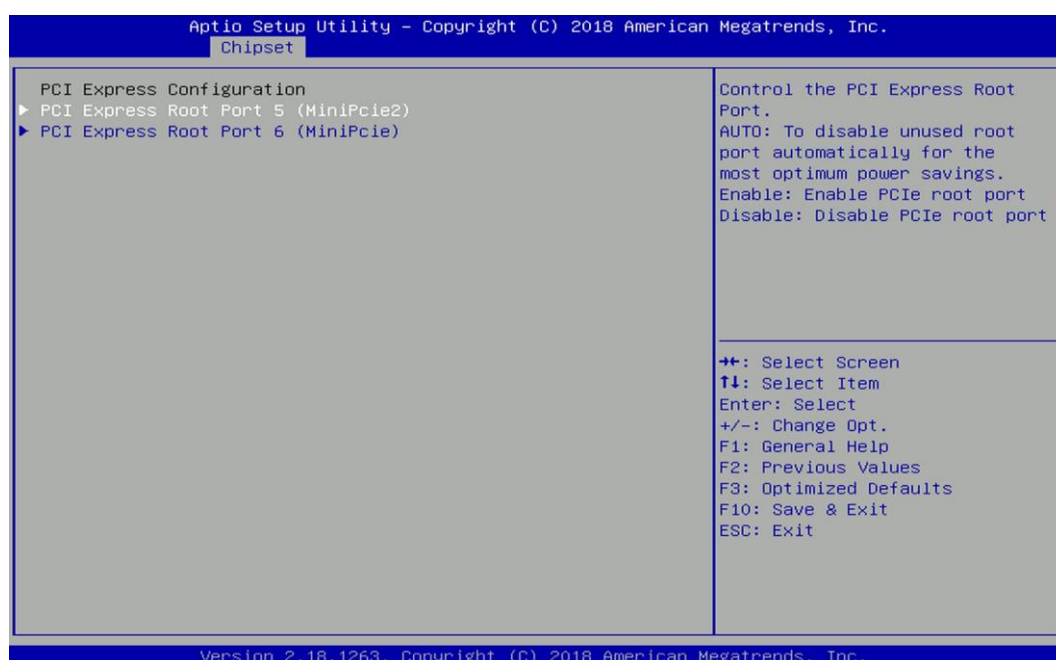

Enables or disables LAN2 Controller.

### 4.4.3 South Cluster Configuration

#### ■ PCI Express Configuration

#### PCI Express Root Port 5 (MiniPcie2)

##### ☐ PCI Express Root Port 5 (MiniPcie2) [Enabled]

Enables or disables PCI Express Root Port.

##### ☐ PCIe Speed [Auto]

Allows you to select PCI Express port speed.

Configuration options: [Auto] [Gen1] [Gen2].

### PCI Express Root Port 6 (MiniPcie)

#### ☐ PCI Express Root Port 6 (MiniPcie) [Enabled]

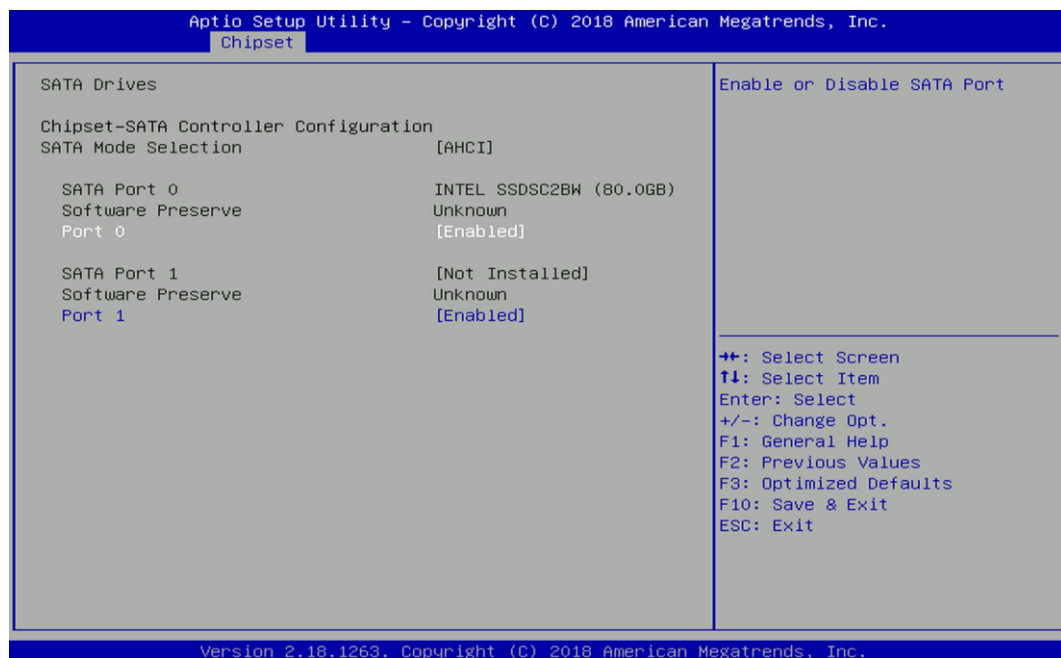

Enables or disables PCI Express Root Port.

#### ☐ PCIe Speed [Auto]

Allows you to select PCI Express port speed.

Configuration options: [Auto] [Gen1] [Gen2].

## ■ SATA Devices

### SATA Port 0

#### ☐ Port 0 [Enabled]

Enables or disables SATA Port 0 (SATA1).

### SATA Port 1

#### ☐ Port 1 [Enabled]

Enables or disables SATA Port 1 (MINIPCI2).

## ■ Miscellaneous Configuration

### ☐ **Restore AC Power Loss [Last state]**

Allows you to specify which power state system will enter when power is resumed after a power failure (G3 state).

[Always on]: Enters to power on state.

[Always off]: Enters to power off state.

[Last state]: Enters to the last power state before a power failure states.

### ☐ **Wake On Lan [Enabled]**

Enables or disables Wake On LAN (WOL) function.

### ☐ **BIOS Lock [Disabled]**

Enables or disables BIOS the SC BIOS Lock enable feature. It is required to be enabled to ensure SMM protection of flash.

## 4.5 Security Setup

This section allows users to configure BIOS security settings.

### 4.5.1 Administrator Password

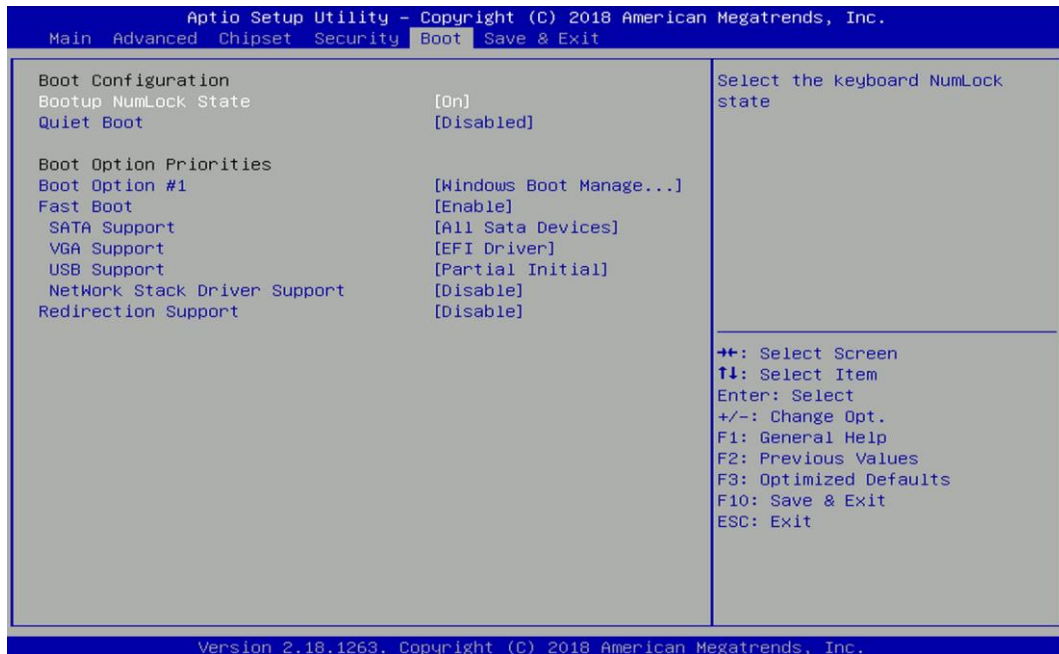

Administrator Password controls access to the BIOS Setup utility.

### 4.5.2 User Password

User Password controls access to the system at boot and to the BIOS Setup utility.

## 4.6 Boot Setup

This section allows you to configure Boot settings.

### ■ Bootup NumLock State

Allows you to set NumLock key to [On] or [Off] state when system boots up.

### ■ Quiet Boot

Allows you to enable or disable Quiet Boot function.

### ■ Fast Boot

Allows you to enable or disable Fast Boot function. If enabled, system boots with initialization of a minimal set of devices required to launch active boot option.

### ■ Hard Drive BBS Priority

Allows you to set the order of the legacy devices in this group.

## 4.7 Save & Exit

### ■ Save Changes and Reset

This item allows you to reset the system after saving changes.

### ■ Discard Changes and Reset

This item allows you to reset system setup without saving any changes.

### ■ Restore Defaults

This item allows you to restore/ load default values for all the setup options.

### ■ Save as User Defaults

This item allows you to save the changes done so far as user defaults.

### ■ Restore User Defaults

This item allows you to restore the user defaults to all the setup options.

# **Chapter 5**

## **Product Application**

## 5.1 Digital I/O (DIO) application

This section describes DIO application of the product. The content and application development are better understood and implemented by well experienced professionals or developers.

### 5.1.1 Digital I/O Programming Guide

#### 5.1.1.1 Pins for Digital I/O of Cincoze P1101 series product

Item	Standard
GPIO74 (Pin107)	DI
GPIO75 (Pin108)	
GPIO76 (Pin109)	
GPIO77 (Pin110)	
GPIO80 (Pin111)	DO
GPIO81 (Pin112)	
GPIO82 (Pin113)	
GPIO83 (Pin114)	

#### 5.1.1.2 Programming Guide

To program the Super I/O chip F81866A configuration registers, the following configuration procedures must be followed in sequence:

- (1) Enter the Extended Function Mode
- (2) Configure the configuration registers
- (3) Exit the Extended Function Mode

The configuration register is used to control the behavior of the corresponding devices. To configure the register, use the index port to select the index and then write data port to alter the parameters. The default index port and data port are 0x4E and 0x4F, respectively. **To enable configuration, the entry key 0x87 must be written to the index port. To disable configuration, write exit entry key 0xAA to the index port.** Following is an example to enable configuration and to disable configuration by using debug.

-o 4e 87

- o 4e 87 (enable configuration)
- o 4e aa (disable configuration)

### 5.1.1.3 Relative Registers

To program the F81866A configuration registers, see the following configuration procedures.

#### Logic Device Number Register (LDN) — Index 07h

Bit	Name	R/W	Reset	Default	Description
7-0	LDN	R/W	LRESET#	00h	00h: Select FDC device configuration registers. 03h: Select Parallel Port device configuration registers. 04h: Select Hardware Monitor device configuration registers. 05h: Select KBC device configuration registers. 06h: Select GPIO device configuration registers. 07h: Select WDT device configuration registers. 0Ah: Select PME, ACPI and ERP device configuration registers. 10h: Select UART1 device configuration registers. 11h: Select UART2 device configuration registers. 12h: Select UART3 device configuration registers. 13h: Select UART4 device configuration registers. 14h: Select UART5 device configuration registers. 15h: Select UART6 device configuration registers. Otherwise: Reserved.

#### 7.7.11.1GPIO7 Output Enable Register — Index 80h

Bit	Name	R/W	Reset	Default	Description
7	GPIO77_OE	R/W	LRESET#	0	0: GPIO77 is in input mode. 1: GPIO77 is in output mode.
6	GPIO76_OE	R/W	LRESET#	0	0: GPIO76 is in input mode. 1: GPIO75 is in output mode.
5	GPIO75_OE	R/W	LRESET#	0	0: GPIO75 is in input mode. 1: GPIO75 is in output mode.
4	GPIO74_OE	R/W	LRESET#	0	0: GPIO74 is in input mode. 1: GPIO74 is in output mode.

#### 7.7.11.3GPIO7 Pin Status Register — Index 82h (This byte could be also read by base address + 3)

Bit	Name	R/W	Reset	Default	Description
7	GPIO77_IN	R	-	-	The pin status of GPIO77/STB#.
6	GPIO76_IN	R	-	-	The pin status of GPIO76/AFD#.
5	GPIO75_IN	R	-	-	The pin status of GPIO75/ERR#.
4	GPIO74_IN	R	-	-	The pin status of GPIO74/INIT#.

7.7.12.1 GPIO8 Output Enable Register — Index 88h

3	GPIO83_OE	R/W	LRESET#	1	0: GPIO83 is in input mode. 1: GPIO83 is in output mode.
2	GPIO82_OE	R/W	LRESET#	1	0: GPIO82 is in input mode. 1: GPIO82 is in output mode.
1	GPIO81_OE	R/W	LRESET#	1	0: GPIO81 is in input mode. 1: GPIO81 is in output mode.
0	GPIO80_OE	R/W	LRESET#	1	0: GPIO80 is in input mode. 1: GPIO80 is in output mode.

3	GPIO83_VAL	R/W	LRESET#	1	0: GPIO83 outputs 0 when in output mode. 1: GPIO83 outputs 1 when in output mode.
2	GPIO82_VAL	R/W	LRESET#	1	0: GPIO82 outputs 0 when in output mode. 1: GPIO82 outputs 1 when in output mode.
1	GPIO81_VAL	R/W	LRESET#	1	0: GPIO81 outputs 0 when in output mode. 1: GPIO81 outputs 1 when in output mode.
0	GPIO80_VAL	R/W	LRESET#	1	0: GPIO80 outputs 0 when in output mode. 1: GPIO80 outputs 1 when in output mode.

#### 5.1.1.4 Sample Code in C Language

##### 5.1.1.4.1 Control of GP74 to GP77 (DI1 ~ DI4)

```
#define AddrPort 0x4E
```

```
#define DataPort 0x4F
```

<Enter the Extended Function Mode>

```
WriteByte(AddrPort, 0x87)
```

```
WriteByte(AddrPort, 0x87)           // Must write twice to enter Extended mode
```

<Select Logic Device>

```
WriteByte(AddrPort, 0x07)
```

```
WriteByte(dataPort, 0x06)           // Select logic device 06h
```

<Input Mode Selection> // Set GP74 to GP77 input Mode

```
WriteByte(AddrPort, 0x80)           // Select configuration register 80h
```

```
WriteByte(DataPort, 0x0X)           // Set (bit 4~7) = 0 to select GP 74~77 as Input mode.
```

<Input Value>

```
WriteByte(AddrPort, 0x82)           // Select configuration register 82h
```

```
ReadByte(DataPort, Value)           // Read bit 4~7 (0xFF)= GP74 ~77 as High.
```

<Leave the Extended Function Mode>

```
WriteByte(AddrPort, 0xAA)
```

#### 5.1.1.4.2 Control of GP80 to GP83 (DO1 ~ DO4)

```
#define AddrPort 0x4E
```

```
#define DataPort 0x4F
```

<Enter the Extended Function Mode>

```
WriteByte(AddrPort, 0x87)
```

```
WriteByte(AddrPort, 0x87)           // Must write twice to enter Extended mode
```

<Select Logic Device>

```
WriteByte(AddrPort, 0x07)
```

```
WriteByte(DataPort, 0x06)           // Select logic device 06h
```

<Output Mode Selection> // Set GP80 to GP83 output Mode

```
WriteByte(AddrPort, 0x88)           // Select configuration register 88h
```

```
WriteByte(DataPort, 0xFF)           // Set (bit 0~3) = 1 to select GP 80 ~83 as Output mode.
```

<Output Value>

```
WriteByte(AddrPort, 0x89)           // Select configuration register 89h
```

```
WriteByte(DataPort, Value)          // Set bit 0~3=(0/1) to output GP 80~83 as Low or High
```

<Leave the Extended Function Mode>

```
WriteByte(AddrPort, 0xAA)
```

#### 5.1.1.5 Change base address - DIO base address (Cincoze default 0xA00)

<Enter the Extended Function Mode>

```
WriteByte(AddrPort, 0x87)
```

```
WriteByte(AddrPort, 0x87) // Must write twice to enter Extended mode
```

<Select Logic Device>

```
WriteByte(AddrPort, 0x07)
```

```
WriteByte(dataPort, 0x06) // Select logic device 06h
```

```
WriteByte(AddrPort, 0x60) // Select configuration register 60h (High Byte address)
```

```
WriteByte(DataPort, (0x0A))
```

```
WriteByte(AddrPort, 0x61) // Select configuration register 61h (Low Byte address)
```

```
WriteByte(DataPort, (0x00))
```

<Leave the Extended Function Mode>

```
WriteByte(AddrPort, 0xAA)
```

**Note:** Cincoze DIO Port base address is 0x0A00h.

### 5.1.1.6 DATA Bit Table (DIO)

7	6	5	4	3	2	1	0	bit
0	0	0	1	-	-	-	-	value
1				X				/h

= DI1

7	6	5	4	3	2	1	0	bit
-	-	-	-	0	0	0	1	value

### 5.1.1.7 DIO I/O Port Address

DI4	DI3	DI2	DI1	DO4	DO3	DO2	DO1	Pin Definition
7	6	5	4	3	2	1	0	Data Bits
DI				DO				DIO
0xA03				0xA02				I/O Port address

## 5.2 Digital I/O (DIO) Hardware Specification

- XCOM+: Isolated power in V+
- XCOM-: Isolated power in V-
- Isolated power in DC voltage: 9~30V
- 4x Digital Input (Source Type)
- Input Signal Voltage Level
  - Signal Logic 0:  $XCOM+ = 9V$ ,  $\text{Signal Low} - V_- < 1V$   
 $XCOM+ > 9V$ ,  $V_+ - \text{Signal Low} > 8V$
  - Signal Logic 1:  $> XCOM+ - 3V$
- Input Driving Sink Current:
  - Minimal: 1 mA
  - Normal: 5 mA
- 4x Digital Output (Open Drain)
  - DO Signal have to pull up resistor to XCOM+ for external device, the resistance will affect the pull up current
  - Signal High Level: Pull up resistor to XCOM+
  - Signal Low Level: = XCOM-
  - Sink Current: 1A (Max)

## 5.2.1 DIO Connector Definition

### DIO1: Digital Input / Output Connector

Connector Type: Terminal Block 1X10 10-pin, 3.5mm pitch

Pin	Definition	Pin	Definition
1	XCOM+ (DC INPUT)	6	DO1
2	DI1	7	DO2
3	DI2	8	DO3
4	DI3	9	DO4
5	DI4	10	XCOM- (GND)

A vertical bar on the left side of the page, consisting of a yellow upper half and a black lower half.

## **Chapter 6**

# **Optional Modules and Accessories**

## 6.1 Location of the Connectors and Switches

Model No.	Description
CFM-IGN101	CFM Module with Power Ignition Sensing Control Function, 12V/24V Selectable
CFM-PoE02	CFM Module with PoE Control Function, Individual Port 25.5W

### SW2: IGN Function Switch

Set shutdown delay timer when ACC is turned off

Pin 1	Pin 2	Pin 3	Pin 4	Definition
OFF / ON	ON	ON	ON	0 second
	ON	ON	OFF	1 minute
	ON	OFF	ON	5 minutes
	ON	OFF	OFF	10 minutes
	OFF	ON	ON	30 minutes
	OFF	ON	OFF	1 hour
	OFF	OFF	ON	2 hours
	OFF	OFF	OFF	Reserved (0 second)

### 24V\_12V\_1: 12V / 24V Car Battery Switch

Pin	Definition
1-2	24V Car Battery Input
2-3	12V Car Battery Input

## 6.2 Installing CFM-IGN Module

1. Locate the IGN connector on system motherboard as indicated.

2. Insert CFM-IGN module vertically to the female connector on the system's mainboard, and fasten 2 screws to fix it.

3. Loosen 2 screws on front panel to remove cover plate.

4. IGN function switch is at the front panel of the system.

## 6.3 Installing CFM-PoE Module

1. Locate the PoE connector on system motherboard as indicated.

2. Insert the female connector of CFM-PoE module to the male connector on system motherboard.

3. Turn over the heatsink and paste the thermal pad onto the marked by red squares.

CAUTION

**Before putting on the thermal block (in the next step), please make sure the protective film on the Thermal Pad has been removed!**

4. Paste the heatsink onto the CFM-PoE module carefully and fasten 2 screws to fix it.

5. Paste the thermal pads onto the heatsink and coil carefully.

CAUTION

**Before assembling the system's chassis cover, please make sure the protective films on the Thermal Pads have been removed!**

6. When the system is power on, please note that the POE LED will light on if the POE module is properly installed.

## 6.4 Installing Display Module

- 1 Locate the module connector slot.

- 2 Turn over the unit to have the bottom side face up, loosen the 2 screws of the module connector bracket.

- 3 Connect the module.

- 4 Fasten the 6 screws to fix the PC module on the display module.

## 6.5 Installing Panel Mount

Step 1. Prepare the mounting kits included with the display.

Step 2. Slot the Panel PC (PPC) into the fixture.

Step 3. Remove all plastic covers.

Step 4. Insert the Mounting Kit with the hook facing away from the fixture.

Step 5. Slide the Mounting Kit away from the fixture to lock it in place.

Step 6. Tighten the screw on the Mounting Kit until the other end sits flush against the fixture.

Step 7. Repeat steps 4-6 until all Mounting Kits have been installed. In this example (CV-221C), 14 Mounting Kits are required to secure the display to the fixture.

## 6.6 Installing VESA Mount

The following picture indicates the VESA mounting hole pattern on the top side of the P1101 series, which is compliant with the VESA mounting standard.

Step 1. Place the VESA stand on top of the PC and align the holes on the stand with the holes on the top side of the P1101.

Step 2. Secure the screws as indicated to mount the assembly onto a VESA stand.

## 6.7 Installing Rack Mount

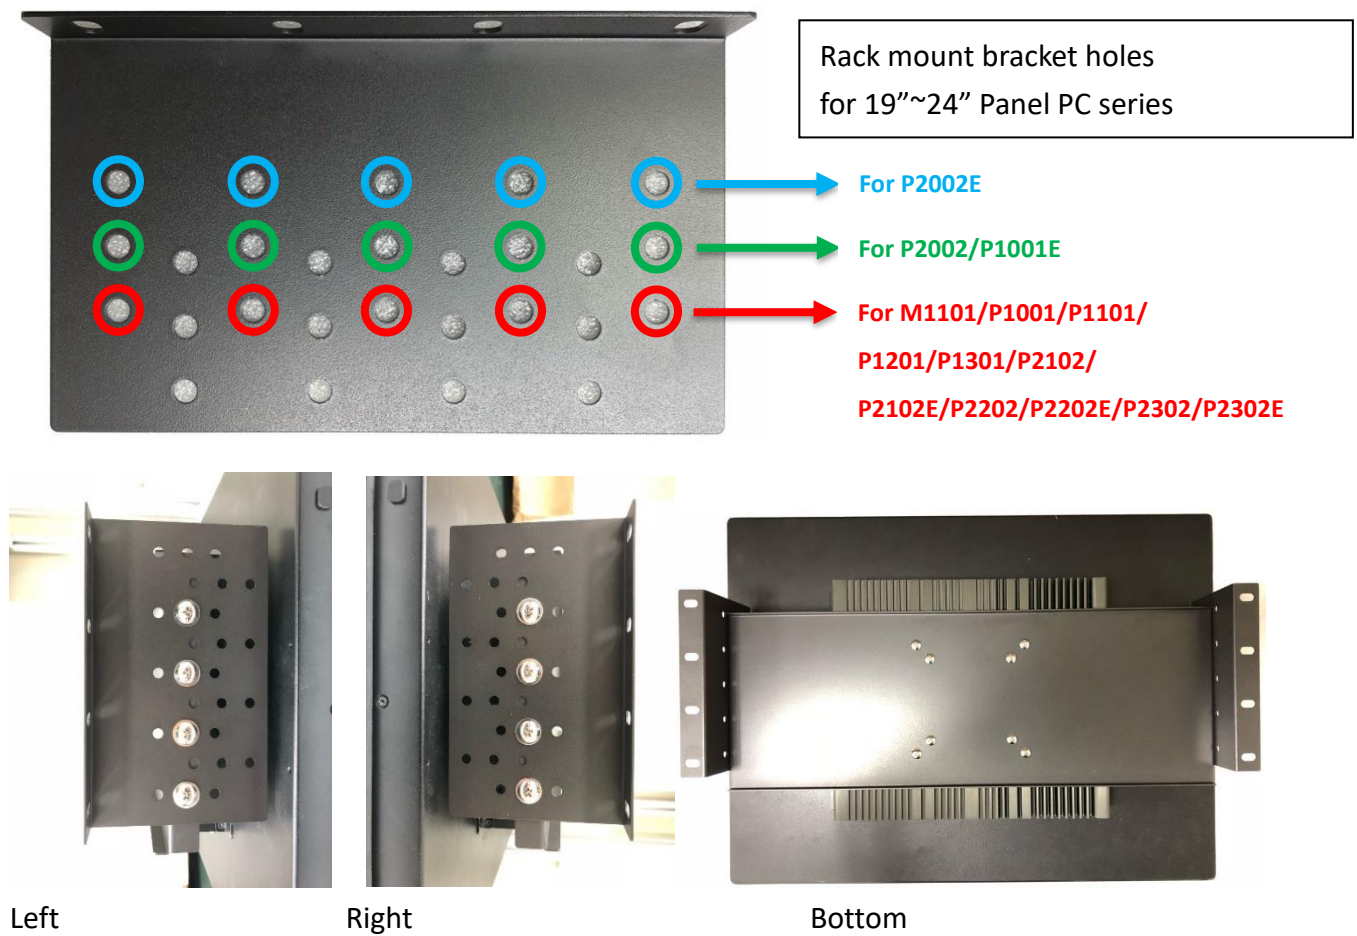

The rack mount cannot be installed simultaneously with a VESA mount.

Step 1. Align the rack mount base with the VESA screw holes as shown below and secure it with screws.

Step 2. Assemble two rack mount brackets by securing 4 screws (M5x6) on each side.

Step 3. Assemble the two rack mount brackets by securing 4 screws (M5x12), flat washers, and hex nuts on each side.
